Caractéristiques & Description

Material	ABS frame, acrylic cylinders
Description	Sieve Shaker Kit, stainless steel screens, acrylic cylinders, ABS frame

This complete mechanical sieve kit provides reliable particle size analysis. Kit includes 20 stainless steel mesh screens and five interlocking cylinders. Shakers are easy to use; place the sample in the top cylinder and shake to distribute particles — the volumetric percentages are indicated on the shaker frame. The clear acrylic cylinders make it easy to see sample and accurately read volume. Each cylinder measures 1.85"L x 2" ID; ABS frame measures 14-1/2"L x 4" ID.
