# Netwell™ Carrier and Handle Instructions

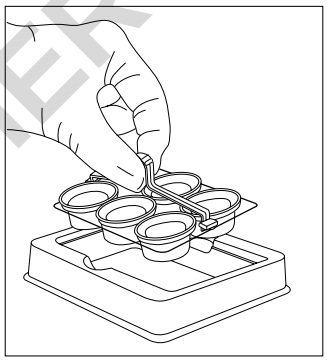

CORNING

## To Load the Netwell Carrier

An easy method to load the Netwell inserts into the reusable carrier is to invert the plate, leaving the Netwell inserts in the plate cover, then place the carrier over the Netwells, and reinvert the assembly.

## To Use the Handle

1. Remove the plate lid.
2. Grasp the handle along its axis between the thumb and forefinger and squeeze.
3. Insert both ends of the handle into the carrier (see insert drawing), and release the handle.
4. Change the grip on the handle 90° (this will prevent you from accidentally squeezing the handle and releasing the Netwell inserts).
5. Pick up the Netwell inserts and transport to the next workstation.
