TECHNICAL DATA SHEET

Cleanroom SpillEx

1. **INTERNATIONAL ARTICLE NUMBER :**
   Non sterile : Ref. DD : **009263** - Ref. fabricant : 150738
   Sterile : Ref. DD : **0092600** - Ref. fabricant : 150739
2. **PRODUCT CLASSIFICATION:** Disposable floor cloth
3. **COMPOSITION:**
   - Top side: Polyethylene film
   - Inner core: Super absorbent material
   - Bottom side: Polypropylene spun bond non-woven (hydrophilic treatment)
4. **TECHNICAL DATA:**

	Typical Value	Unit
Weight	45	g
Size of cloth	51 x 37	cm
Total absorbency per cloth, tap water	1.2	L
Total absorbency per cloth, NaCl 0.9 %	0.5	L

5. **PRODUCT PROPERTIES & PRODUCT USAGE**
   - Highly absorbent material ideal for removing of all kinds of water-based spills
   - Lightweight and ultra-thin construction quickly moves liquid to absorbent core
   - Water-impermeable film on bottom side for hygienic removal after use
   - High concentration of super absorbent material for holding high volume of liquid without dripping
   - Very high liquid absorbency. One pad absorbs 500-1200 mL of liquid in application
   - Ideal for pre-cleaning to remove liquid contaminations, followed by mopping step
   - Application areas examples:
     - spill removal from floors and hard surfaces
     - drip catching barrier pad underneath equipment and working areas
     - work surface spill/splash control
   - Low particle shedding:
     (Particle testing in accordance with IEST-RP-CC003.3)
   - 10 pads per pack
   - Storage life: 12 months - expiration date on product label
   - Designed for use in cleanrooms and controlled environments

   Application:
   - Place with non-woven side down on the spill for 30-120 seconds, depending on liquid composition
   - Place with non-woven side up for drip and leak conditions
   - Do not use SpillEx for high concentrated chemicals. Do not stand on or cut SpillEx
6. **STORAGE, TRANSPORTATION & DISPOSAL**
   Keep palletized products in a cool and dry place. Avoid exposure to direct sunlight. Product is not subject to transportation regulations for hazardous substances or chemicals. Disposal via landfill or incineration possible.
7. **QUALITY APPROVALS / COMPLIANCE WITH INTERNATIONAL STANDARDS**
   - This product is manufactured conforming to appropriate standards within FHCS Quality System.
   - SpillEx is not made from hazardous materials

Date: 2016/01/11

SpillEx

Super-absorbing. Super safe!

SpillEx

– the problem solver

Spillages on hard floors can cause considerable problems.

Blood, urine or bodily fluids in operating theatres and elderly people´s homes might contaminate the environment and lead to infections.

A soft drink spilled onto the fast-food restaurant floor or a smashed bottle on the supermarket floor might cause an accident by slipping on the wet surface and the site could also be faced with associated legal costs.

Not to worry, there is a solution to spillage problems – SpillEx from Vileda Professional.

Why traditional floor cleaning doesn´t work

When laundering microfiber mops, which have been used to remove blood spills, you put the contaminated mop in contact with up to 50 other mops. Not an ideal situation, even if you do a disinfection laundering process.

Also – using a bucket and wringer is an inappropriate method. When dipping the used mop into the bucket, it will contaminate the clean water after the first rinse.

SpillEx takes care of the problem

SpillEx is a disposable super-absorbing floor cloth that takes care of liquid spillages in minutes. One SpillEx absorbs and holds up to 1.200 ml of water and up to 500 ml of NaCl 0.9% (similar to urine) and it will not drip when lifting and moving, as SpillEx transforms the liquid spill into a gel.

SpillEx is the ideal problem solver where you need to absorb spillages, before the actual floor cleaning takes places. No risk of cross-contamination and no risk of soiling the bucket water with the spillage.

Simple as 1-2-3

1. Place SpillEx on the spillage, with the absorbent unprinted side down.
2. Wait until the spillage is completely soaked up by SpillEx. If the spillage area is bigger than the SpillEx – simply move and cover the remaining spillage area.
3. Pick up the used SpillEx and dispose of it.

Weight per cloth	45 g
Size	51 x 37 cm
Typical spill uptake in application with tap water	1.2 l
Typical spill uptake in application with NaCl 0.9% (urine)	0.5 l
