Controlled Environment Trolleys

Carriers that meet the highest cleanroom conditions

100 % versatile. 0 % stress.

Stop carrying heavy buckets and cleaning utensils from the storage area to the cleanroom. Use Vileda Professional tried-and-tested tailor-made trolleys that makes daily cleaning life easier.

The CE trolley range has been specifically designed and developed for use in controlled environments, and both trolleys are of course fully autoclavable.

The well thought-through trolleys are extremely functional and versatile with superior ergonomics, which add to the Vileda Professional cleaning system approach.

Whether you are cleaning according to the pre-prepared method or bucket method, we have a trolley suitable for you!

They carry what you need.

But no bacteria or contaminants.

Both trolleys offer ample space for all utensils needed for effective cleaning. One major customer benefit is the possibility to tailor-make and customise each trolley to exact specifications or needs. Buckets, boxes, sieves, bin bags – you decide and specify!

The trolleys also include the new innovative Vileda Professional Dip-N-Go sieve, when high disinfection contact times are demanded.

When designing the trolley, maximum contamination control had full focus.

ElectroPolished stainless steel with air tight connections and smooth welding, ensures excellent biological control and is easy to clean and is autoclavable.

We've been around

Vileda Professional has been a leading player in the cleaning industry for over 50 years. Also working with many blue chip clients in the Controlled Environment market.

Naturally, our products and systems meet business standards and practices such as ISO 14644-5, IEST RP CC018 and life science GMPs.

With more than 60 engineers and scientists constantly developing business-leading solutions we know what you need to keep your cleanroom clean – you can count on that.

Untreated stainless steel containing contaminants.

Electropolished stainless steel, free of contaminants.

By electropolishing the metal surface roughness is reduced down to micro levels. The extremely smooth surface means reduced risk of contamination, particles or product residues.

Pre-prepared trolley

Working Station

Top shelf with fixed box position for 1 pre-box or 2 x 6l buckets. Innovative drawer shelf construction for easy access to our cleanroom mops.

Bin-bag holder

70l bin bag holder to dispose of used mops. 70l bin bag size avoids slipping of bags during use and contributes to the operators ergonomics.

Support bar

Support bar for optional Dip-N-Go Sieve to operate with the Dip-N-Go Method.

Storage Area

Store your pre-box. Ability to place 25l longish bucket due to integrated stabilisers.

Frame Holders

Two Flat mop frame holders on each side with extended length to operate in all trolley executions.

Detachable

Airtight, and put on/off for

Handle

New innovative handle any dirt traps or issues. Ultimate fixation of by extra pin

Electropolished stainless steel

Contamination free welding. Easy

Cleanroom
