Simport®

Since 1975 Scientific inc.

Fully dedicated to your needs.

DOMINIQUE DUTSCHER SAS

Our mission

At Simport Scientific, we've proudly supported science and healthcare since 1975 by designing and delivering high-quality, innovative laboratory products worldwide.
Driven by a strong family spirit, we work as a team with integrity, passion, and dedication—always striving to improve, innovate, and be a partner our customers can count on. Our goal is to support those whose mission is to improve human well-being.

Histology & **Cytology** collections

Simport® offers you the widest choice of Histology Disposables on the market. By choosing Simport®, you will be sure to find a cassette especially suited to fill your specific needs when processing regular tissue samples, single and multiple biopsy and also large specimens. Most models can be used with automated labeling machines. Simport® also manufactures many products to assist you with transportation, storage and staining of microscope slides.

Here is a list of available products:

- Biopsy Foam Pads
- Cassettes for Printers
- Cytology Funnels
- Disposable Base Molds
- Dissecting Boards
- Drain Racks
- Embedding Rings
- Microscope Slide Folder
- Microscope Slide Mailers
- Microscope Slide Staining Systems
- Microscope Slide Storage Boxes
- Microscope Slide Tray
- Modular Storage Drawers
- Prefilled Specimen Containers
- Tissue Capsules
- Tissue Cassettes with Metal Lid Tissue / Biopsy Cassettes with Plastic Lid
- Tissue Microarray Mold Kits

DOMINIQUE DUTSCHER SAS

NEW PRODUCT

Laser cassettes

Precision, Permanence and Performance in One

Engineered for flawless traceability and long-term durability.

Key Features:

- ✓ **Optimal Traceability**: Permanent, perfectly legible marking ensures reliable sample tracking.
- ✓ Proven Resistance: Markings remain stable and resistant to solvents, dyes, and histological processes.
- ✓ Simplified Coding: Available in multiple distinct colors for streamlined workflow organization.
- ✓ Universal Compatibility: Designed to integrate seamlessly with most laboratory laser printers.
- ✓ Clinical Reliability: Significantly reduces reading errors and specimen mismanagement risks.

Technical Specifications

- High-resolution laser printing directly on the cassette.
- Capability to integrate precise and durable barcodes.
- Optimized surface for clean and permanent marking.

Technical Innovation

- ✓ The 45 ° angled front surface allows permanent, high-resolution marking using laser technology.
- ✓ A special chemical compound carbonizes under the laser beam, ensuring durable and indelible identification.

Cassettes are supplied in stacks held by adhesive tape, facilitating quick loading into printer hoppers.

DOMINIQUE DUTSCHER SAS

Cassettes

M480 Embedding Cassettes

Made of acetal

Disposable plastic tissue cassettes are suitable for holding and identifying tissue samples in processing, embedding, and sectioning procedures. The cassettes fit securely in microtome chuck adapters and are resistant to the chemical action of most histological solvents. These cassettes are designed to accept standard metal lids (cat.# M481) and will keep specimens in complete safety during processing. The slanted writing surface accepts markings easily, permitting sample identification throughout all stages of embedding and long afterwards when in archives. They are available in 11 colors. Each case contains 3 dispenser boxes of 500 cassettes.

M480SL & M480T Cassettes in **QuickLoad**™ Sleeves and Stacks

Made of acetal

The sleeved cassettes are compatible with most cassette printers. Cassettes with tape are to be Ink Jet printers. Molded from a special high density acetal polymer, they keep specimens safely submerged and are resistant to the chemical action of most solvents used in histology laboratories. The efficient flow-through slots maximize fluid exchange and ensure proper reagent drainage.

M485 HISTOSETTE® Tissue Processing / Embedding Cassettes

Made of acetal

Most convenient for cassette labeling instruments since covers are already removed from cassettes and are packaged separately in the case. Disposable plastic cassettes hold tissue specimens during processing and embedding, as well as in storage. Molded from a special high-density polymer, these patented cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage.

The anterior writing area is slanted at a 45 ° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments. Available in 11 colors. Each case contains 2 dispenser boxes of 500 cassettes and 1 dispenser box of 1000 covers.

M486 HISTOSETTE® Biopsy Processing / Embedding Cassettes

Made of acetal

Most convenient for cassette labeling instruments but specially designed to hold biopsy specimens during the embedding process, as well as in a storage file. The covers are already removed from cassettes and are packaged seperately in the case.

Anterior writing area is at a 45 ° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments. Each case contains 2 dispenser boxes of 500 cassettes and 1 dispenser box of 1000 covers.

How to use a HISTOSETTE®

Identify sample on either the front labeling area.

Press on back tab to open cover.

Insert sample.

Close cover and press front of lid to lock it in place.

To open, lift tab at the back of cassette with forefinger while depressing the center of lid with thumb.

To remove the cover, pivot the lid forward and it will disconnect automatically.

DOMINIQUE DUTSCHER SA

Cassettes

M490 HISTOSETTE® Tissue Processing / Embedding Cassettes

Made of acetal

Disposable plastic cassettes hold tissue specimens during the embedding process, as well as in a storage file. Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are totally resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. Just snap apart and conveniently lock the lid into the base of the cassette. They can be opened or closed as requ ired they can be open or closed and they always relock securely without danger of specimen loss. Anterior writing area at a 30 ° angle. Not suitable for automated printers.

Each case contains 3 dispenser boxes of 500 cassettes.

M491 HISTOSETTE®

Biopsy Processing / Embedding Cassettes

Made of acetal

Disposable plastic cassettes similar to Series M490 but specially designed to hold biopsy specimens during the embedding process, as well as in a storage file. Anterior writing area at a 30 ° angle. Not suitable for automated printers.

Each case contains 3 dispenser boxes of 500 cassettes.

Anatomy of a HISTOSETTE®

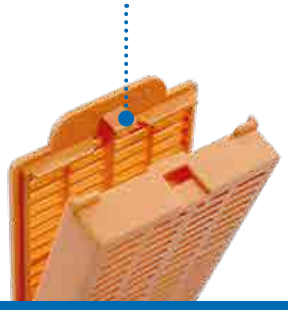

The snap off lid can be easily removed, slid forward and snapped into the locked position.

Because it has efficient flow-through slots, fluid exchange and proper drainage are maximized.

Larger unobstructed writing surface sloped at 30 ° angle.

Because it has a back mounted locking device, it will never open during processing.

DOMINIQUE DUTSCHER SAS

M492 HISTOSETTE® Tissue Processing / Embedding Cassettes

Made of acetal

Disposable plastic cassettes hold tissue specimens during processing and embedding, as well as in storage. Molded from a special high-density polymer, these patented cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. They can be opened and closed as often as necessary and will always relock securely without danger of specimen loss.

The anterior writing area is slanted at a 45 ° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments. Available in 11 colors. Each case contains 3 dispenser boxes of 500 cassettes.

M493 HISTOSETTE® Biopsy Processing / Embedding Cassettes

Made of acetal

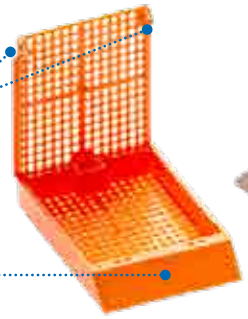

Similar to M492 but specially designed to hold biopsy specimens during the embedding process, as well as in a storage cabinet. Anterior writing area is at a 45 ° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments. Each case contains 3 dispenser boxes of 500 cassettes.

How to use a HISTOSETTE®

Unique front hinge design allows single handed cassette manipulation.

Unobstructed front writing surface sloped at 45 ° makes the cassette compatible with most automated cassette labeling machines.

Back mounted locking device securely holds the lid in place and will never open during processing.

Efficient flow-through slots in lid and base maximize fluid exchange, thereby ensuring proper drainage.

DOMINIQUE DUTSCHER SAS

Cassettes

M498 HISTOSETTE® Tissue Processing / Embedding Cassettes

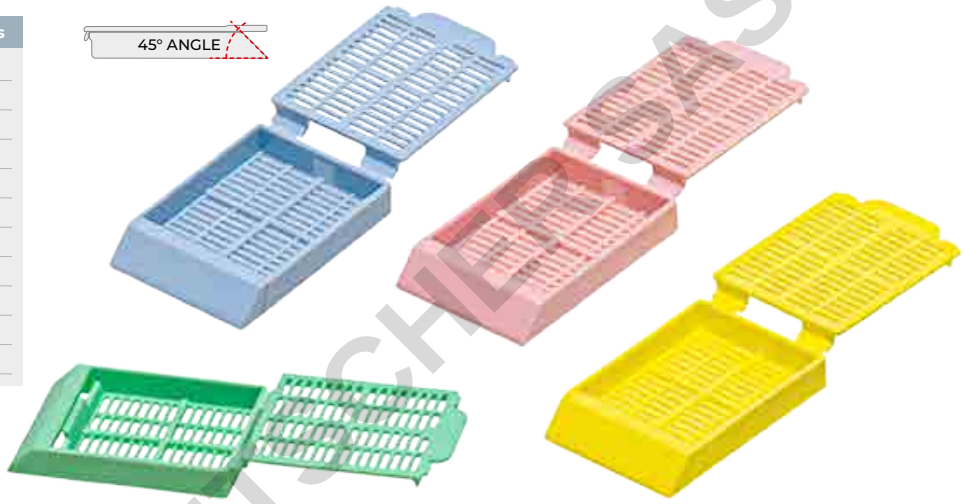

Made of acetal

These cassettes are identical to Series M490 but the anterior writing area has a 45 ° instead of a 30 ° angle. The acute angle makes these cassettes more suitable to be used with some models of cassette labeling instruments.

These disposable plastic cassettes hold tissue specimens very efficiently during the embedding process, as well as in a storage file. Molded from acetal, these cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. Just snap apart and conveniently lock the lid into the base of the cassette. They can be opened or closed as required they can be open or closed and they always relock securely without danger of specimen loss. Each case contains 3 dispenser boxes of 500 cassettes.

M499 HISTOSETTE® Biopsy Processing / Embedding Cassettes

Made of acetal

This model of cassette is similar to Series M498 and is specially designed to hold biopsy specimens during the embedding process. Each case contains 3 dispenser boxes of 500 cassettes.

How to use a HISTOSETTE®

Separate cover by folding it forward and backward.

Identify in front or sides.

Insert sample.

Slide cover in place and lock it.

After processing, remove cover by pulling on back tab.

DOMINIQUE DUTSCHER SAS

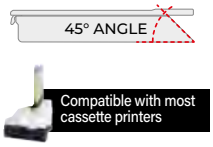

M502 MICROSETTE® Biopsy Processing / Embedding Cassettes

FOR IVD USE CE CH

Made of acetal

Biopsy pads are no longer necessary with these innovative disposable plastic biopsy cassettes with a large compartment measuring 25 x 30 mm. Perfect even with needle biopsies since mesh holes have a diameter of only 0.26 mm while still allowing for maximum fluid exchange and drainage. Molded from a special high density polymer, these patented cassettes keep specimens safely submerged in liquid and are resistant to most histological solvents. They can be opened and closed as often as necessary and they always relock securely without danger of specimen loss. Available in 11 colors. Anterior writing area is at a 45 ° angle to make the cassette more suitable to be used with certain types of cassette labeling instruments.

Each case contains four dispenser boxes of 250 cassettes with covers assembled.

Anatomy of a MICROSETTE™

Back mounted locking device securely holds the lid in place and will never open during processing.

Cover and base have over 2000, 0.26 mm square openings to maximize fluid exchange and ensure proper drainage.

Excellent fluid exchange through slots.

No biopsy pads necessary.

Air vents allowing more efficient filling with paraffin.

M507 MICROMESH™ Biopsy Processing / Embedding Cassettes

FOR IVD USE CE CH

Made of acetal

This version of the Micromesh™ offers 1676 square openings (0.38 mm) allowing for a greatly improved fluid exchange and drainage without having to use biopsy pads. Large anterior slots in both cassette and cover ensure that the Micromesh™ biopsy cassette will sink rapidly. A large square compartment measuring 27 mm is perfect even for needle biopsies. The cover does not protrude above the cassette, a great space saving feature allowing more cassettes to be stacked in automatic labeling machines and tissue processors.

Molded from a special high density polymer, these patented cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. They can be opened and closed as required they can be open or closed and they always relock securely without danger of specimen loss. Anterior writing area is at a 45 ° angle to make the cassette more suitable to be used with automated cassette printers. Available in 11 colors.

Each case contains four dispenser boxes of 250 cassettes with covers assembled.

Anatomy of MICROMESH™ Cassettes

Cover pre-installed on cassette

Large anterior and posterior slots in both cassette and cover ensure that the Micromesh™ biopsy cassette will be submerged rapidly

Anterior writing area is at a 45 ° angle

A recessed cover is a great space saving feature, allowing more cassettes to be stacked in automatic labeling machines and storage drawers.

M508 MICROMESH™ Biopsy Processing / Embedding Cassettes

FOR IVD USE CE CH

Made of acetal

This model is similar to Series M507 but cassettes have four square compartments each measuring 13 mm. Cover and base have about 1676 square openings maximizing fluid exchange and ensuring proper drainage.

Each case contains four dispenser boxes of 250 cassettes with covers assembled.

With four compartments each measuring 13 mm

DOMINIQUE DUTSCHER SAS

Cassettes

M509 SLIMSETTE™ Tissue Processing / Embedding Cassettes

Made of acetal

The SLIMSETTE™, a new generation emerging in the Simport® Histology Family. More compact, easier to use and more efficient than ever. Similar to the design of the M507 model, it incorporates a unique recessed cover a great space saving feature allowing more cassettes to be stacked in automatic labeling machines and in storage cabinets.

Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The SLIMSETTE™ ensures efficient fluid exchange and drainage thanks to 114 openings each measuring 1 x 5 mm. They can be opened and closed as required they can be open or closed and they always relock securely without danger of specimen loss. Large labeling areas for easy identification. The anterior writing area is slanted at a 45 ° angle. Available in 11 colors.

Each case contains 3 dispenser boxes of 500 cassettes with covers assembled.

Dimensions: 41 x 28.5 x 6 mm H (1 5/8 x 1 1/8 x 1/4 in. H)

Cassettes

M515 SWINGSETTE™ Tissue Processing / Embedding Cassettes

Made of acetal

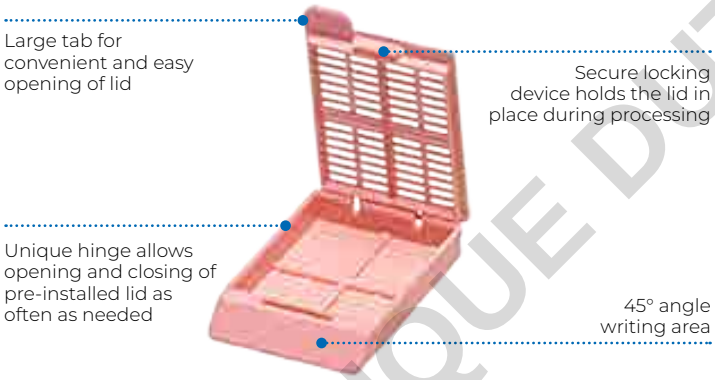

These disposable plastic cassettes hold tissue specimens during processing and embedding, as well as in storage. Molded from a special high-density polymer, they keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage.

This new model differs by the special hinge holding the base and cover together. This hinge allows cassettes to be opened and closed as often as necessary. The cover can be removed and re-inserted easily without danger of specimen loss.

Available in 11 colors.

Each case contains 3 dispenser boxes of 500 cassettes.

M518 SWINGSETTE™ Biopsy Processing / Embedding Cassettes

FOR IVD USE CE CH

Made of acetal

Most convenient for cassette labeling instruments since the covers are packaged separately in the case. These biopsy cassettes are similar to the M517 Series but are especially designed to hold biopsy specimens during the processing / embedding process as well as in storage cabinets.

Each case contains two dispenser boxes of 500 cassettes and one box of 1000 covers.

DOMINIQUE DUTSCHER SAS

SuperFLO™

The **SuperFlo™** pore opening design allows a steady flow of fluid for maximum reagent exchange. Such a high level of fluid exchange results in less incidence of unfixed or under-processed tissues and faster fixation/processing of tissue specimens.

The cassettes have a 45˚ degree writing surface and are designed for optimal workflow in the most popular Cassette Printers.

The **SuperFlo™** can be opened and closed as required and they always relock securely without danger of specimen loss.

DOMINIQUE DUTSCHER SAS

SuperFlo™ Next Generation Histology Cassettes

The SuperFlo™ cassette represents the evolution of biopsy cassettes within Simport®'s histology product line. Designed to maximize tissue processing efficiency, this one-piece molded cassette features unique pore openings (0.64 x 0.64 mm, 0.91 x 3.67 mm or 0.30 X 0.30 mm depending on the model) and lateral vents that allow optimal reagent flow from all four sides. This high level of fluid exchange significantly reduces the risk of unfixed or under-processed tissues, promoting superior fixation, dehydration, and tissue impregnation.

Its sloped, basket-style design prevents small specimens from getting trapped in corners, ensuring secure handling of delicate biopsies. The cassette also includes a front-opening mechanism that can be opened and closed up to five times, with a reliable locking system to prevent specimen loss. Made from high-density polymer, it keeps tissues fully submerged in liquid and is highly resistant to most common histological solvents.

Cassettes

M533 Series SuperFlo™ Tissue Processing / Embedding Cassettes

Made of acetal

The SuperFlo™ is the new generation in Simport®`s Histology Family. This tissue cassette has unique pore openings of 0.91 x 3.67 mm and lateral vents allowing for maximum reagent exchange from all 4 sides. Such a high level of fluid exchange results in less incidence of unfixed or under-processed tissues. Better liquid exchange means better tissue fixation, dehydration, and impregnation which are at the basis of efficient tissue processing.

This SuperFlo™ model has a special hinge that holds the base and the cover together. The hinge design allows the cassette to be opened and closed as often as required. It is a front-opening cassette with a 45-degree smooth writing surface.

Molded from high-density polymer, this cassette keeps specimens safely submerged in liquid and is resistant to the chemical action of most histological solvents.

This tissue cassette model is supplied assembled and sold in bulk. For this model in taped stacks for use with Ink Jet printers, please refer to M433T. For the sleeved model for Thermo Fisher printers, please refer to M533SL.

Each case contains 3 dispenser boxes of 500 cassettes with covers assembled.

Dimensions: 41 x 28.5 x 6 mm H (1 5/8 x 1 1/8 x 1/4 in. H)

Features:

- Unique lateral vents, fluids can access tissue from all 4 sides
- Basket style for small tissue management
- Special hinged cover design with front opening
- Smooth 45° angle writing surface
- Available in 11 colors

How to use a SuperFlo™

This model differs by the special hinge that holds the base and cover together. The hinge design configuration allows for multiple opening and closing of the lid.

The cover of the SuperFlo™ is attached to the back of the base in an open position.

To close, simply tilt cover forward, holding it by the front tab.

Push cover down until a click is heard.

To open, tilt cover backward. It will remain attached to the base and can be closed again.

M407 MICROMESH™ for Primera© Printer

FOR IVD USE CE CH

Made of acetal

The MICROMESH™ offers 1676 square openings (0.38 mm) allowing for a greatly improved fluid exchange without having to use biopsy pads. Large anterior and posterior slots in both cassette and cover ensure that the MICROMESH™ Biopsy Cassette will sink rapidly.
A large square compartment with a side measuring 27 mm is perfect even for needle biopsies. The cover does not protrude above the cassette, a great space saving feature.

Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents.
The MICROMESH™ mesh ensures efficient fluid exchange and drainage. The one-piece integral lid eliminates the need for separate steel lids.

They can be opened and closed and always relock securely without danger of specimen loss.
Anterior writing area is at a 45 ° angle.

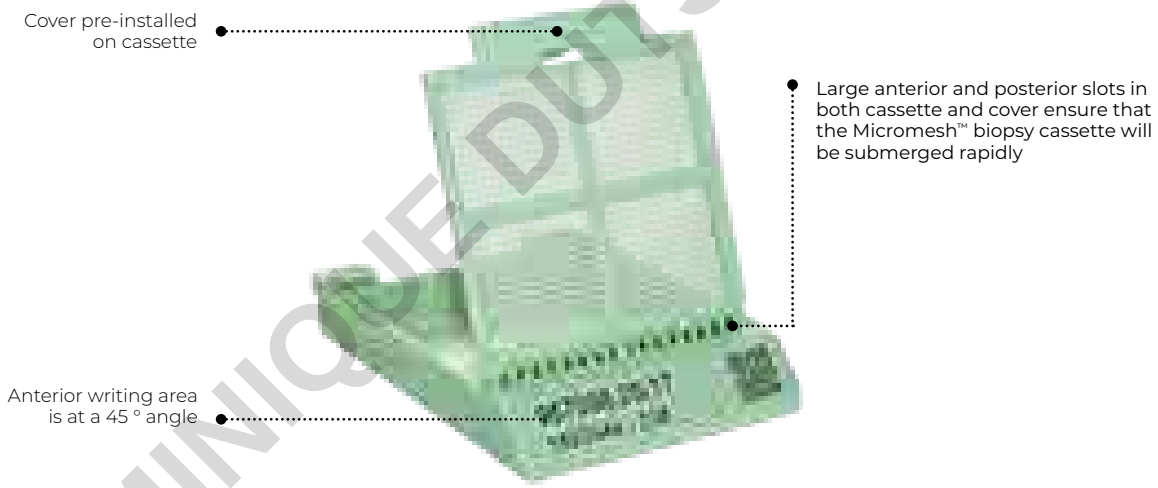

QuickLoad™ Stacks

Cassettes in sleeve and stack

Cassettes bases and lids are ordered separately

M485SL & M486SL HISTOSETTE® Cassettes in QuickLoad™ Sleeves

FOR IVD USE CE CH

Made of acetal

Suitable for hoppers accepting plastic sleeves, these cassettes will load in cassette labeling instruments in one simple operation. Save time and money with these convenient sleeves of 75 unique Simport® cassettes. No more manual insertion, one cassette at a time. Just load the cassette sleeve in the hopper and you are ready for printing.

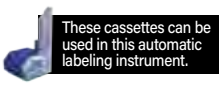

These specially designed cassettes belong to the world-wide known Simport® HISTOSETTE® Series. Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage.

Two types of cassettes are offered in order to suit your particular needs: a regular tissue cassette and a biopsy model designed to hold small biopsy samples securely during the embedding process. Anterior printing area is at a 45 ° angle, offering an unobstructed view of the writing surface and making the cassette perfectly suitable to be used with cassette labeling instruments.

The one-piece disposable plastic cover eliminates the need for reusable steel lids. It can be opened and closed as often as necessary and it always relocks without danger of specimen loss. Available in 11 colors.

Each case contains 10 sleeves and 750 covers.

Cassettes in sleeve

M507SL MICROMESH™

Biopsy Cassettes in **QuickLoad™** Sleeves

FOR IVD USE CE CH

Made of acetal

Suitable for hoppers accepting plastic sleeves, these cassettes will load in cassette labeling instruments in one simple operation. Just load the 75-cassette QuickLoad™ sleeve in the hopper and you are ready for printing.

The Micromesh™ offers 0.38 mm square openings, and large anterior slots allowing for increased fluid exchange and faster sinking in liquids. No biopsy pads are necessary. These cassettes feature a recessed cover and a large square 27 mm compartment, perfect even for needle biopsies.

Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of histological solvents. The lid can be opened and closed as often as necessary and always relocks securely without danger of specimen loss. Anterior writing area is at a 45 ° angle to make the cassette more suitable to be used with automated cassette printers. Available in 11 colors. Each case contains 10 sleeves.

Lids are pre-mounted on cassettes

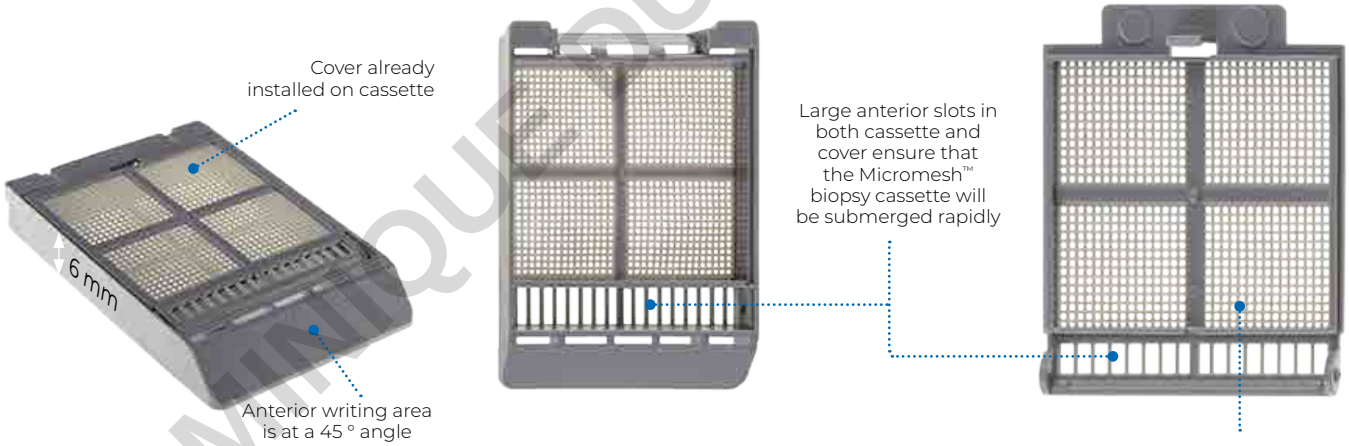

NO BIOPSY PADS REQUIRED

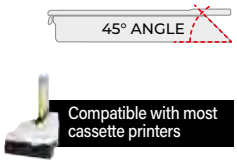

DOMINIQUE DUTSCHER SAS

Cassettes in sleeve

M509SL SLIMSETTE™ Tissue Cassettes in **QuickLoad™** Sleeves

Made of acetal

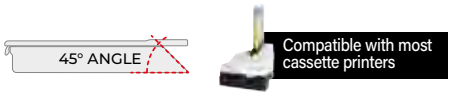

The transparent sleeve allows viewing of cassettes in order to confirm there is no jam in the sleeve during the printing process.

This model is similar to the M507 cassette but is intended for tissue processing/ embedding procedures. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. Lids can be opened and closed as required they can be open or closed and they always relock securely without danger of specimen loss. When ready for the embedding process, covers can conveniently be snapped off and discarded.

Anterior writing area at a 45 ° angle. Available in 11 colors.
Each case contains 10 sleeves of 75 cassettes.

M507T MICROMESH™ Biopsy Cassettes in QuickLoad™ Stacks

FOR IVD USE CE CH

Made of acetal

The MICROMESH™ offers 1676 square openings (0.38 mm) allowing for a greatly improved fluid exchange without having to use biopsy pads. Large anterior and posterior slots in both cassette and cover ensure that the MICROMESH™ Biopsy Cassette will sink rapidly. A large square compartment with a side measuring 27mm is perfect even for needle biopsies. The cover does not protrude above the cassette, a great space saving feature.

Molded from a special high density polymer, these patented cassettes keep specimens safely submerged in liquid and are resistant to the chemical action of most histological solvents. The MICROMESH™ mesh ensures efficient fluid exchange and drainage. The one-piece integral lid eliminates the need for separate steel lids. They can be opened and closed as required they can be open or closed and they always relock securely without danger of specimen loss. Anterior writing area is at a 45° angle to make the cassette more suitable to be used with automated cassette printers. Choose from 11 standard colors. Cassettes are packaged in stacks of 40. M512 MACROSETTE® Processing / Embedding Cassettes (with lid)

Made of acetal

Disposable plastic cassettes designed to hold larger tissue specimens during the embedding process, as well as in a storage cabinet. Dimensions are exactly the same as the ones of a regular HISTOSETTE® cassette but the MACROSETTE® is twice as high (13 mm).

The one-piece integral lid eliminates the need for separate steel lids. It can be opened and closed as often as necessary and will always relock securely without danger of specimen loss. Large labeling areas are located on three sides of the cassettes for your convenience. Each case contains three dispenser boxes of 250 cassettes.

Dimensions: 40.1 x 28.5 x 13 mm H (1 9/16 x 1 1/8 x 1/2 in. H)

Cat. #	Color	Qty/Cs
M512	White	750

M475-10 Disposable Deep Base Mold

Made of PVC

Designed especially for M512 MACROSETTE®. Thanks to the specially formulated plastic material, it offers excellent thermal exchange. It has a smooth interior finish and rounded corners facilitating specimen removal.

Cat. #	Size (mm)	Vol	Qty/Cs
M475-10	37 x 24 x 10	5 ml	500

M474 Base Molds

Made of Stainless Steel

Sizes fit most cassettes. Superior thermal exchange. These molds are for all applications in specimen embedding with all styles of Embedding Rings and Cassettes. Manufactured from high-quality stainless steel for optimal thermal conductivity, the molds have a highly polished surface for easy paraffin block removal. Well corners are rounded for optimal paraffin ribboning.

Temporarily unavailable for sale in the U.S.A.

M475 Disposable Base Molds

Made of PVC

Simport® disposable base molds offer ease and convenience of operation. They are inexpensive enough to be discarded after use, yet strong enough to be reused. Thanks to the specially formulated plastic material, they offer excellent thermal exchange. They have a smooth interior finish and rounded corners facilitating specimen removal. Also, they are available in the same variety of sizes as metal molds and can be used with the same styles or types of cassettes and embedding rings. Each case contains two dispenser boxes of 500 base molds.

KoolPlate™

Cooling Tray

- Keeping paraffin blocks cold up to 4 hours
- Made of high impact polystyrene for longevity
- Styrofoam insulator base

DOMINIQUE DUTSCHER SAS

M479-24

The Simport KoolPlate™ is ideal for chilling and preparing paraffin blocks, for sectioning at the microtome or for performing other laboratory procedures.

It freezes overnight (16 hours) in a conventional freezer and the surface remains cold for up to 4 hours when used with the supplied Styrofoam insulator base placed under the KoolPlate™to prolong cooling and prevent moisture accumulation. It is made of thick wall high impact polystyrene in order to ensure a sturdy construction that will last for years.

The KoolPlate™ is stackable, a great space saving feature.

Dimensions: 279 mm x 139.7 mm x 25.4 mm H. (11 x 5 ½ x 1 in. H.)

Warning: Not for use with organic solvents such as toluene, xylene, acetone, etc...

Temporarily unavailable for sale in the U.S.A.

Storage Containers

The CryoSette™ Frozen Tissue Storage Containers

M956O CryoSette™

FOR IVD USE

Base made of acetal

Screw closure made of high-density polyethylene

- Offers sample specimen storage in upright chest freezers and vapor-phase Dewar flasks at -196 °C*
- 2D Barcoding available for efficient sample tracking
- Maintains the integrity of tissue samples
- Choice of two storage boxes
- 95 kPa tested

The Simport CryoSette™ is designed for frozen tissue collection, transport and storage. It can also be used for storing a multitude of other specimens in all laboratories. The robust design of the cryosette ensures that tissue morphology will be well preserved.

This 2.5 ml container features a wide-mouth opening and a high integrity screw closure. It is designed with a flat bottom and straight sides for easy tissue removal. The specific shape of the Cryosette™ allows its manipulation to be optimized, whether you are using gloves or not. The CryoSette™ efficiently stores tissue samples in -86 °C ULT freezers or in the gas phase of liquid nitrogen in Dewar flasks at -196 °C but not in LN2 liquid phase.

The CryoSette™ screw closure and base are designed so they will not seize at low temperatures. Rapid visual 1 1/4 turn, even during repeated freeze / thaw cycles. Color-coded inserts are available in 5 colors.

The CryoSette™ offers two surfaces for handwriting or applying barcode labels: an anterior surface and a larger space underneath the base. A thin cardboard I.D. label and a plastic transparent cover are available for the latter. A 2D barcode insert can also be placed on the anterior writing surface for rapid visual sample identification. The CryoSette™ is compatible with common tracking methods. The anterior writing surface is improved for ink adherence.

The large size of the CryoSette™ chamber is suitable for most storage applications.

Chamber dimensions: 20 mm O.D x 18.5 mm I.D. x 10.5 mm H.

Total CryoSette™ dimensions : 24 mm x 38 mm x 11 mm H.

CryoSette™ Features

I.D. label and plastic cover available under cat. nos. M956LAB and M956COV

Large chamber designed to accommodate bigger samples

* Use only in the gas phase of liquid nitrogen

DOMINIQUE DUTSCHER SAS

Storage Containers

M956-21 CryoSette™ Storage boxes

Made of polypropylene

The M956-21 storage rack is designed to contain 21 frozen tissue Cryosette™ containers. The box is compact and has an SBS standard footprint to make suitable to several robotic storage systems. These innovative boxes can be stored in low-temperature freezers.

Temperature range -196 °C to +121 °C. Suitable for cryogenic storage, but only in gas phase of liquid nitrogen.

Dimensions : 127.76 mm x 85.48 mm x 41.6 mm H.

- Compatible with leading frozen sample storage systems
- Thick walls minimizing deformation due to temperature changes
- Can be handled by robotic equipment
- Rack orientation marks on sides
- Latches for locking and unlocking rack lid
- Autoclavable

Latch for locking and unlocking rack lid. When lock is on, the CryoSette™ is prevented from falling out if rack is inverted or dropped.

M957BK-2D

2D Barcode Insert allows for immediate coding of your samples.

The 2D Insert is manually pushed in and locks into place on top of the slanted front marking surface.

Inserts are generated by a permanent laser etching system which provides sharper detail and are tested to ensure readability and uniqueness.

M956-40 CryoSette™ Storage boxes

Made of polypropylene

The M956-40 CryoSette™ storage box can accommodate up to 40 Tissue Storage Containers in a space as small as 133 mm x 133 mm x 52 mm H. Made of extra strong polycarbonate, this durable cryogenic storage box is designed to be used at temperatures between -196 °C and +121 °C. Autoclavable at 120 °C, 15 psig (1 bar) for 20 minutes. Suitable for cryogenic storage, but only in gas phase of liquid nitrogen.

The frosted cover allows the user to write directly on top of the box, and is keyed to the base to prevent misalignment.

M473 T-Sue™ Microarray Mold Kits

Molds made of silicone

Tissue Microarray (TMA) is a technique enabling tissues from many patients to be arrayed on a single slide. The array mold is specifically designed to be simple, easy to use and inexpensive. Tissues can be analyzed in the same conditions enhancing the efficiency of the research.

The Simport® T-Sue™ array molds will allow you to perform TMAs faster while giving excellent results. By using array molds, you can process up to 170 specimens onto one single slide in very little time.

- View many different samples on the same slide
- Process up to 170 specimens onto one slide
- Easily stored in a drawer
- Can be reused dozens of times without losing its flexibility
- Withstands temperatures between -100 °C to +250 °C

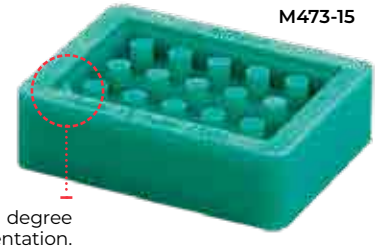

Cat. #	Array Mold Cores	Core Ø (mm)	Qty/Pk
M473-15	15	4	1
M473-24	24	2	1
M473-36	36	3	1
M473-60	60	2	1
M473-72	72	1.5	1
M473-150	150	1.5	1
M473-170	170	1	1

Each kit includes ONE T-Sue™ array mold and FOUR punch needles with stylet allowing easy removal of tissue cores for insertion. See how-to-use instructions.

ANATOMY OF A T-SUE™ MICROARRAY MOLD

- Molds made of silicone
- Choice of seven microarray molds offering 15 to 170 cores
- Temperature resistant up to +250 °C
- Can be reused hundreds of times

One inside wall corner at 45 ° degree angle, facilitating orientation.

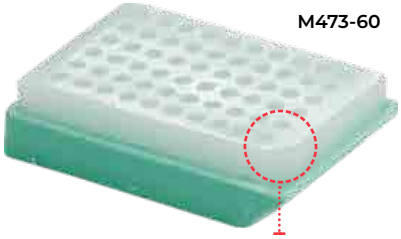

Flexible for easy removal of recipient block

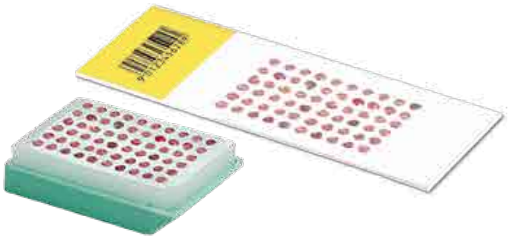

Easy positioning of cassette

BENEFITS OF A PRECAST T-SUE™ PARAFFIN RECIPIENT BLOCK

- No special training or experience needed
- Ready to accept cores from donor block
- Choice of seven paraffin blocks holding between 15 and 170 specimens
- Support cassette is permanently bonded to block
- Consistent core diameter

45° degree angle for orientation

It is the easiest, most convenient and less expensive kit available for constructing paraffin tissue microarrays.

DOMINIQUE DUTSCHER SA

Accessoires

M473PC Precast T-Sue™ Paraffin Blocks

Molds made of paraffin

Cassettes made of acetal

Simport® offers a series of precast T-Sue™ Microarray paraffin blocks for constructing tissue arrays without the need of specialized equipment. With a T-Sue™ Microarray Paraffin Block Kit, one can construct a tissue array block in minutes, simply by punching the donor tissue cores and inserting them into the pre-made paraffin recipient block. It's easy, fast and no specific technical training or experience is needed.

It is the easiest, most convenient and less expensive kit available for constructing paraffin tissue microarrays. How-to-use Instructions are included.

M476 Biopsy Foam Pads

Made of polyester urethane foam

Simport® biopsy foam pads are used to hold biopsies in place and prevent them from being lost during processing. They are made of a specially formulated foam which is always verified for consistency throughout in order to achieve optimum solvent flow. Biopsy samples are sandwiched between two foam pads and are placed either in tissue capsules or cassettes* with metal or plastic lids. M476-4 model is to be used with the Micromesh™ and Slimsette™ Cassettes. M476-5 is specially suited for the HISTOSETTE® Cassettes. Will resist temperatures from -40 °C to 121 °C.

Cat. #	For use with	Size (mm)	Qty/Pk	Qty/Cs
M476-1	Cassettes	30.2 x 25.4 x 2	1000	10 000
M476-2	Small capsules	25.4 x 2.7	1000	10 000
M476-3	Large capsules	34.6 x 2	1000	10 000
M476-4*	Slimsette	27.4 x 25.4 x 2	1000	10 000
M476-5**	HISTOSETTE®	30.2 x 25.4 x 2	1000	10 000

*Use with the following Simport® cassette Series: M509 and M510.
** Use with the following Simport® cassette Series: M492, M493, M485 and M486.

M476-5 is specially suited for the HISTOSETTE® Cassettes

M478 Biopsy Bags

Made of nylon

These sturdy biopsy bags are made of white nylon thin mesh (0.3 mm diameter), reducing the risk of specimen loss during processing. While solvent resistant, they provide great tissue safety and excellent fluid exchange. In order to ease specimen removal, bags can be peeled open. All seams are heat-sealed. Available in three sizes.

Cat. #	Size (mm)	Qty/Pk
M478-1	30 x 50	1000
M478-2	45 x 75	1000
M478-3	75 x 95	500

While providing maximum tissue safety, you can conveniently see through the biopsy bags.

Transfer the biopsy in the bag with a pair of forceps OR empty both fixative and specimen in the bag. Let the fixative drip out of the bag in a container, close the bag and insert in a cassette.

After processing, remove bag from cassette. Open with care, extending the edges.

Extract biopsy and proceed with your embedding.

M477-6 Paraffin Block Mailer, 6 compartments

Made of PVC

At last, a transport container made especially for paraffin blocks. Sturdy and easy to use, the Simport® mailer is transparent for easy viewing of contents. It can be used for handling and shipping up to 6 blocks as needed, while having to keep only one model of block mailer in inventory. The attached cover is easy to close but very secure when closed. Suitable for all regular models of tissue and biopsy cassettes.

Cat. #	Dimensions	Qty/Cs
M477-6	134 mm x 141 mm x 29 mm H (5 1/4 x 5 5/8 x 1 1/8 in. H)	50

DOMINIQUE DUTSCHER SAS

Accessoires

M470 & M471 Tissue Capsules

Made of polypropylene

These capsules are suitable for holding tissue samples during processing. The lids have a frosted write-on area for sample identification and an open mesh area to facilitate fluid exchange. The entire surface of the base is also an open mesh. The lid snaps securely on the base, eliminating the risk of tissue loss during processing.

Cat. #	Size (mm)	Color	Qty/Cs
M470	20 x 5 H	White	1000
M471	38 x 10 H	White	1000

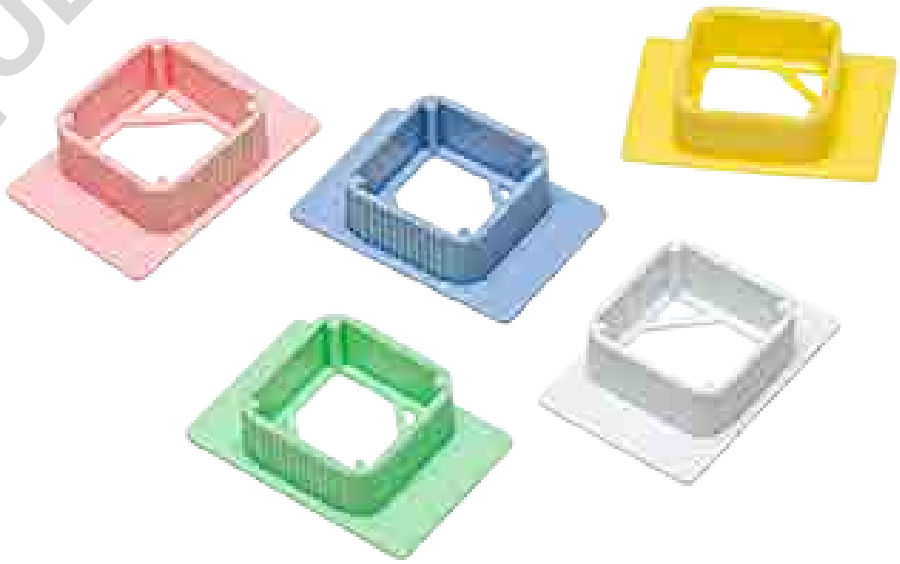

M460 Embedding Rings

Made of high impact polystyrene

Embedding rings are suitable for holding and identifying tissue sample blocks and fit well in microtome chuck adapters. The etched writing surface on the ring is marked with an identification number and placed on top of the sample block. Additional paraffin is poured into the base mold to cement the ring onto the tissue block. The embedding ring securely holds the tissue sample in the microtome chuck adapter for sectioning and then identifies the sample while in storage. Rings are available in different colors. Each case contains 4 dispenser boxes of 250 rings.

Cytology Funnels

CytoSep™ Collection

The Simport® CytoSep™ Collection is a series of Cytology Funnel sample chambers specially designed to concentrate cells into thin-layer preparations. Simport® is one of the most trusted names in the disposable plasticware marketplace, providing quality products since 1975 and is proud to offer the largest choice of Cytology Funnels on the market by manufacturing numerous models for use with the Shandon Cytospin® 4 Cytocentrifuge, the Sakura Cyto-Tek® Cytocentrifuge, the Hettich Cyto-System, the Unitech (Wescor) Cytopro® Cytocentrifuge and finally the StatSpin Cytofuge® 2 Cytocentrifuge. They are safer than reusable sample chambers and lower your risk of contamination to pathogenic samples. After use, they are simply discarded. The CytoSep™ Cytology Funnels are a time saver compared to cleaning and sterilizing reusable sample chambers. The Simport® CytoSep™ Cytology Funnels are recommended for the following applications:

- Bronchial alveolar lavage washes
- Cerebrospinal fluids
- Exudates and transudates
- Fine needle aspirates, and other aspirates
- Gastric washes
- Oral cavity washes
- Pericardial fluids
- Peritoneal fluids
- Pleural fluids
- Sputum
- Synovial fluids
- Urine

DOMINIQUE DUTSCHER SAS

Cytology Funnels

Consumables for the Shandon Cytospin® Cytocentrifuges

Single CytoSep™ Cytology Funnel

Fully compatible with the Shandon CytoSpin® Centrifuge, Simport® CytoSep™ Cytology Funnels can be used to deposit a thin layer of cells in a clearly defined area of a microscope slide. The filter card absorbs any excess fluid. These Cytology Funnels have the filter cards pre-attached for consistent, reliable results. No alignment necessary! All disposable Funnels are packaged with closure caps to seal in specimen for added protection. All components also available separately.

For sample volumes of up to 0.5 ml, use the Simport® Single CytoSep™ Cytology Funnel with a White Filter Card and Cap. It provides a cell deposition area of 6 mm dia. (28 mm2). Can be use with all stainless steel slide clips.

For sample volumes of up to 0.4 ml, such as Spinal Fluids for example, use the Single CytoSep™ Cytology Funnel with Brown Filter Card and Cap. It allows for a slower absorption of fluids. All the individual components are also available separately.

ALL PLASTIC Single and Double **CytoSep™** Cytology Funnels

These are so easy to use, and improve turn-around time while giving more diagnostic information. Being totally disposable, they eliminate time-consuming decontamination and cleaning. They are safe to use and reduce the risk of exposure to pathogenic samples. They also decrease the possibility of cross-contamination.

This series of Simport® Single CytoSep™ Cytology Funnels is single-use. The disposable sample chambers do not need metal clips and are designed to meet any processing requirement. They are capable of producing high quality thin-layer slide preparations while improving laboratory efficiency.

The disposable Sample Chambers with White Filter Cards are used for sample volumes up to 0.5 ml; the ones with the Brown Filter Cards are for sample volumes up to 0.4 ml. The cell deposition area is 6 mm in diameter (28 mm2). Filter cards are pre-attached. Excellent for scanty specimens such as CSF. All components also available separately.

The double CytoSep™ Cytology Funnel allows two sample deposition areas on a single slide. This disposable sample chamber does do not need metal clip. This Sample Chamber is also disposable.

Cytology Funnels

Consumables for the Shandon Cytospin® Cytocentrifuges MEGA CytoSep™ Cytology Funnel

The Simport® ALL PLASTIC CytoSep™ MEGA Funnel provides an easy, efficient and cost effective method of producing high quality thin-layer slide preparations. It eliminates the need for stainless steel slide clips, offering laboratory workflow improvements. It is dedicated for convenient preparation of larger volume samples.

This larger funnel is quick and easy to remove. The large rectangular cell deposition area of 22 x 14.75 mm (325 mm2) provides for up to 12 times the sample volume (6 ml) of the single CytoSep™ Cytology Funnel. It produces more cost-effective thin layer preparations when compared to other thin layer methods. Strategically placed baffles inhibit cell settling which results in uniform cell deposition and excellent quality slide preparations. Simport® ALL PLASTIC CytoSep™ Cytology MEGA Funnel and Cap minimize user exposure to pathogens while reducing the risk of specimen cross-contamination. Can prepare both air-dried and fixed preparations.

Cytology Funnels

Consumables for the StatSpin Cytofuge® 2 Cytocentrifuge

Simport® CytoSep™ Cytology Funnels for the StatSpin Cytofuge® 2 Cytocentrifuge allow cells to gently concentrate in a 7 mm diameter area on the slide while supernatant is simultaneously absorbed by a filter card. Will accept 50-400 µl of sample. Produces cell monolayer presentations of excellent quality. Disposable filter sold separately.

Cat. #	Description	Qty/Pk
M968-1	Cell Concentrator only	48
M968FW	Disposable Filter Concentrator	200

Consumables for the Hettich Cyto-System

The Simport® CytoSep™ Funnel Chambers for the Hettich Cyto-System optimize lab throughput with multiple funnel options. These funnels are perfect for every application such as CSF, Viral infections, bronchial secretions and come in four sizes from 1 ml to 8 ml. The 1 ml chamber is for small-volume samples of low cell contents. Both 2 and 4 ml chambers are suggested for cell-rich samples, e.g. pleura, ascites and bronchial washings while the 8 ml chamber is perfect for large-volume samples such as urine.

M984 Series
EZ SHANDON CYTOCENTRIFUGE Components

New Product

M984-10FW

EZ SHANDON CYTOCENTRIFUGE
SINGLE FUNNEL WHITE FILTER & CAP

A disposable sample chamber with a pre-attached filter card and cap. Cell deposition area of 6 mm in diameter. Excellent for hypocellular specimens such as cerebrospinal fluid.

Sample volume from 0.1 to 0.5 ml. High absorbency white filter card.

200/case

M984-10FW

M984-20FW

CYTOSEP EZ SHANDON CYTOCENTRIFUGE
DOUBLE FUNNEL WHITE FILTER & CAP

A disposable sample chamber that allows two sample depositions on a single slide with a pre-attached filter card and cap. The two cell deposition areas measuring 6 mm in diameter are ideal for immunochemistry techniques.

Sample volume from 0.05 to 0.25 ml. High absorbency white filter card.

200/case

M984-20FW

M984-30M

CYTOSEP EZ SHANDON
CYTOCENTRIFUGE MEGA FUNNEL &CAP

A disposable high-volume sample chamber with cap.

Designed for spinning large samples from 0.5 to 6.0ml.

Cell deposition area of 22 x 14.7 5mm (325 mm2).

Minimizes the need to pre-centrifuge.

25/case

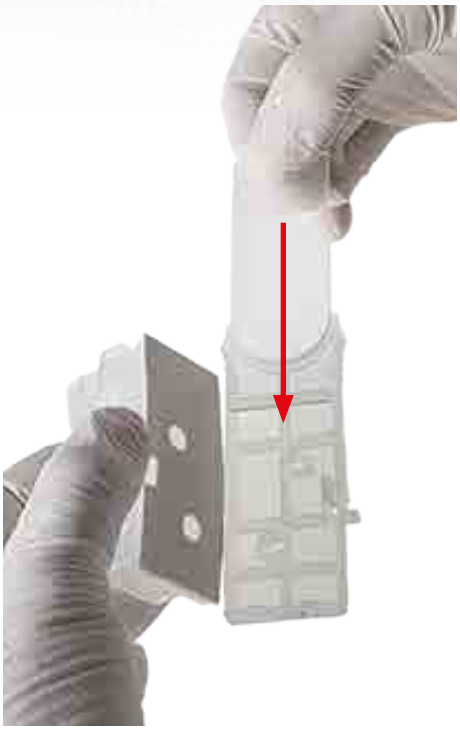

M984-30M

DOMINIQUE DUTSCHER SAS

Cytology Funnels

How to use the Funnels

Insert microscope slide.

Close the two sections together until a click is heard.

Press both sections together. It is important that the locking mechanism is securily in place.

Verify that the two sections are fully locked together.

To open, press on the lever to allow the funnel to open.

DOMINIQUE DUTSCHER SAS

M620 DissecTable™
Dissecting Board

Made of high-density polyethylene

A new and unique approach makes this dissecting board more convenient than any other found on the market today. It is no longer necessary to buy different sizes as this board offers a large surface on one side and two smaller ones on the other side.

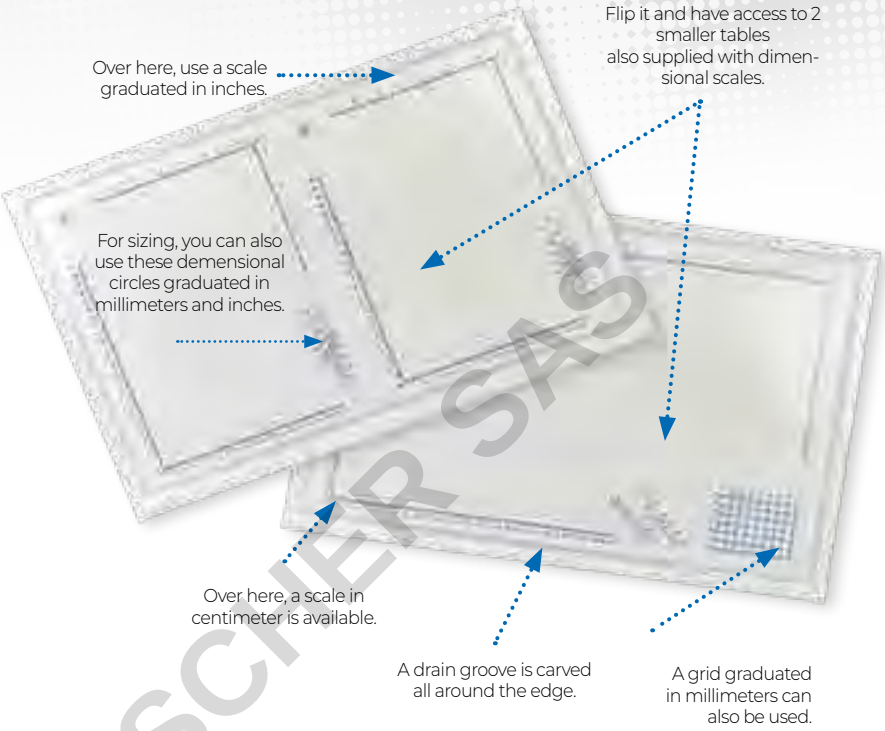

Made of heavy-duty stain resistant thick polyethylene, it will last for years to come without changing shape, bending or swelling. Will not dull fine surgical blades. In order to contain fluids, a drain groove is carved all around the edge of the DissecTable™.

On one side, you will find a large cutting area including dimensional scales in inches and centimeters, along with a 60 x 80 mm grid made of 48 x 10 mm squares. Six dimensional circles are also printed from 1/8 to 5/8 in. and 4 to 14 mm in diameter Flip it over and the other side offers two cutting boards half the size with the same dimensional features printed on each one of them.

All corners have rubber feet giving more stability to the working surface.

Dimensions: 575 mm x 400 mm x 12.5 mm
(23 x 16 x ½ in H)

Cat. #	Description	Qty/Cs
M620	DissecTable™	1

M618 DissecTable™ Jr.
Dissecting Board

Made of high-density polyethylene

A smaller DissecTable™ is also available with the same features and benefits as the M620. Perfect for smaller counter area.

Dimensions: 330.2 mm x 279.4 mm x 12.5 mm (13 x 11 x ½ in H)

M618	DissecTable™ Jr.	1

M625 Board Base (for use with M620)

Made of high impact polystyrene

To make dissecting more confortable, this heavy-duty base is used to elevate the DissecTable™ Board to the right height. The bases are stackable and will not move sideways during the dissecting work. The base will also retain excess fluid if necessary.

Dimensions: 481 mm x 656 mm x 91 mm (19 ¼ x 26 ¼ x 3 ⅝ in H)

Cat. #	Description	Qty/Cs
M625	DissecTable™ Board Base.	1

Each base raises the DissecTable™ by 91 mm (3 ⅝ in.)

DOMINIQUE DUTSCHER SAS

Dissection

M630 DispoCut™ Disposable Dissecting Board

Made of polyproplene

The DispoCut™ Disposable Dissecting Board is strong yet inexpensive enough to throw away. It is especially developed to provide a clean, safer and more efficient way of handling infectious tissue specimens for the pathologist. It can be used on both sides, a great money saving feature. Printed with helpful imperial and metric dimensional scales in inches, centimeters and millimeters. Available in three sizes to accommodate small biopsies to large gross anatomy procedures.

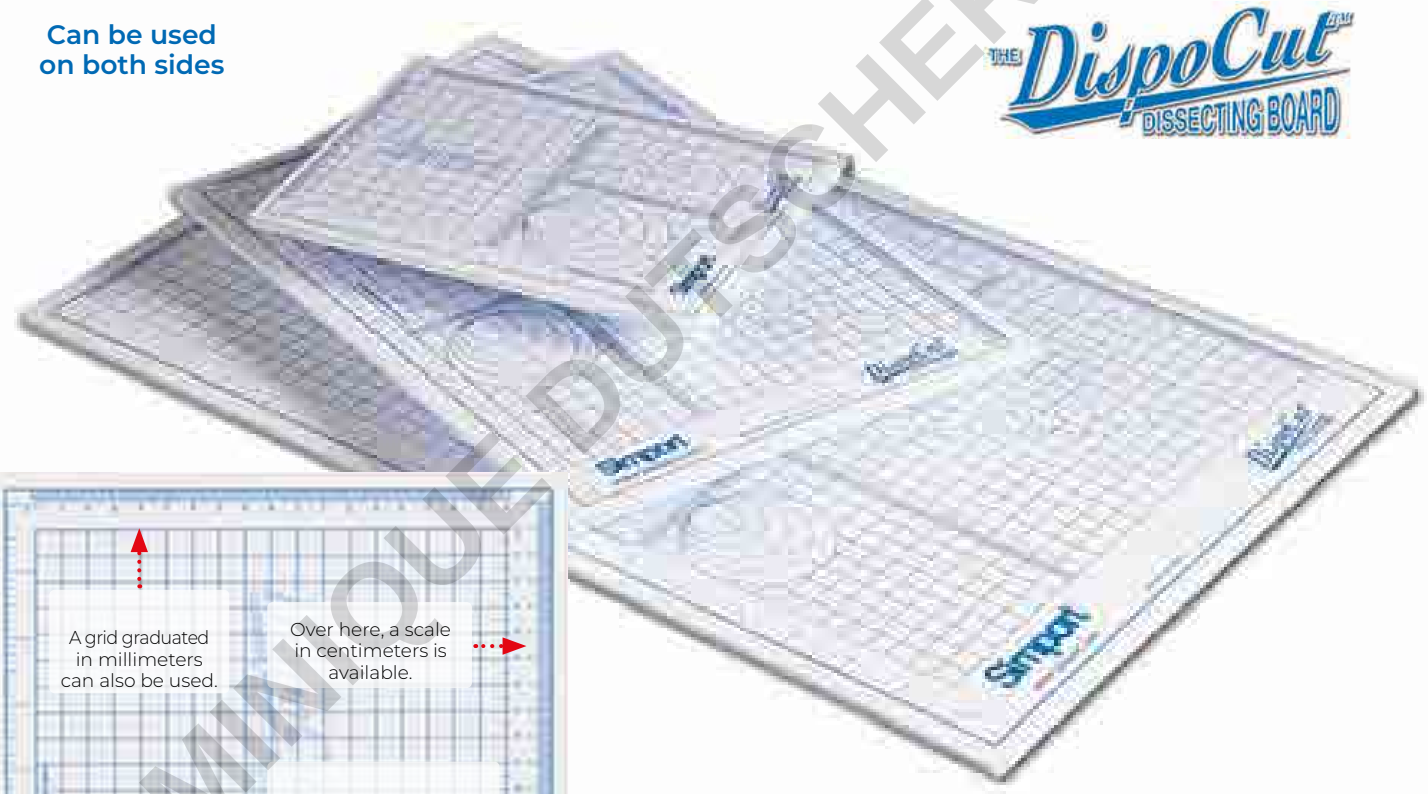

DispoCut™ is extrusion made using a copolymer resin in order to increase impact and temperature performance. Copolymer resins are also used because they retain the ability to be flexed an unlimited number of times without breaking. Chemically, DispoCut™ is inert. At regular temperatures most oils, solvents and water have no effect, allowing it to perform under adverse conditions or as a product component exposed to harsh chemicals.

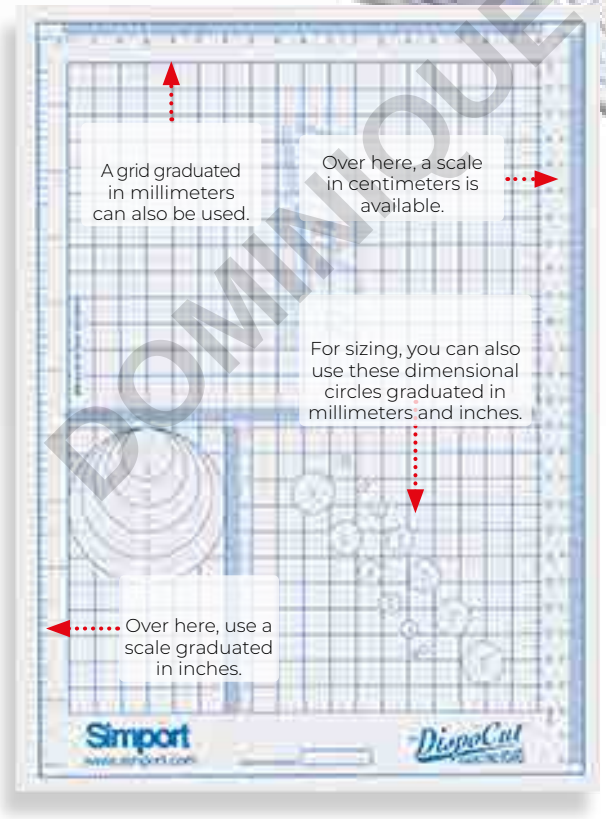

Each surface has many conveniently located rulers including seven dimensional circles from 4 to 16 mm in diameter and five larger ones from 2 to 6 cm in diameter. Surface will not dull knifes. Perfect for use with dissecting pins. All sizes of DispoCut™ Disposable Dissecting Boards are ideal for pathology labs, medical schools, classroom dissections, forensic labs, medical research labs, pharmaceutical labs, surgery and more.

Temperature performance range: -27 °C to 71 °C (17 °F to 160 °F)

Sterilization: DispoCut™ may be wiped down with alcohol with no effect on the material (light rubbing). Autoclavable, at 121 °C for 30 mins. There are some extreme settings which will be damaging and we suggest a trial to determine performance in your equipment.

Can be used on both sides

Slide Staining

Slide Staining Rack sold separately

M900 EasyDip™ Slide Staining System

Made of acetal

Finally a user-friendly approach for staining your microscope slides, the EasyDip™ Slide Staining System has two components: a square staining jar and a 12-position vertical slide rack. As an extra benefit, they are available in 5 different colors to help better identifying contents or applications.

The staining jar being made of resistant acetal plastic will not break like most glass jars do. It will resist to most staining agents including alcohol and xylene (but not phenol, iodine or ferric chloride). The wide stable base offers greater stability while the inside is recessed, allowing for a smaller reagent volume of only 80 ml. Easy to clean and no metals to corrode. Ideal for special stains, frozen sections and special processes.

Dimensions: 64 x 76 x 92 mm H (2 1/2 x 3 x 3 5/8 in. H).

Slide Staining

StainTray™ Slide Staining System

Made of ABS Plastic

Another user friendly approach to immunohisto-chemistry staining. This tray is also suitable not only for routine staining requiring a humid chamber but is also ideal for Hematology, Cytology and Microbiology laboratories. Manipulation is made safe and easy by using only one hand.

The StainTray™ has a black base made of tough ABS plastic withstanding a wide range of chemicals (avoid chlorinated hydrocarbons). They will accept 10, 20 or 30 slides even if tray is held at an angle. When humidity is needed, wells between rails will hold up to 1 ml of water securely without splashing. Middle wells will hold up to 2 ml each. Rails are raised not only to avoid water touching the slides but to make them more easily retrievable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space saving purposes.

Two chamber covers are available:

- Clear allowing for visual examination. Made of PETG with a temperature range of -20 °C to +60 °C.
- Black for fluorescent work. Made of ABS with a temperature range of -80 °C to +80 °C

M950 LockMailer™

Microscope Slide Jar

Jar made of Polypropylene

Closure made of High Density Polyethylene

At last a tamper evident multi purpose container for mailing, staining or storing microscope slides.

Constructed of extra-strong and clear polypropylene, it will hold up to 4 standard 3 x 1 in. or 75 x 25 mm slides vertically. Inside channels are slotted to keep slides safely separated. Perfect also for slide conveyors and specimen slide transport between the doctor's office and the lab.

It incorporates a unique tamper evident leakproof screw cap ensuring your peace of mind during transport or storage situations where someone might have manipulated your slides without your prior knowledge. Can also be used without the tamperproof locking mechanism. For color coding purposes, use a Capinsert™ (see T345 Series).

The container is designed for maximum stability on a bench top while having an internal volume of only 12 ml.

Dimensions: 35 x 87 mm H (1 3/8 in. x 3 7/16 in. H)

If you TRULY care about your sample, let us help you PROTECT its integrity!

Can also be used as a slide staining jar

Slide Staining

M800 UniMailer™ Slide Mailer

Made of high impact polystyrene

For many years now, noticeable improvements on the design of slide mailers have been scarce. Following many suggestions from users in the lab field, Simport® is now proud to come out with the UniMailer™, a truly versatile model which can easily be used for handling and shipping one or as many slides as needed, while having to keep only one model in inventory.

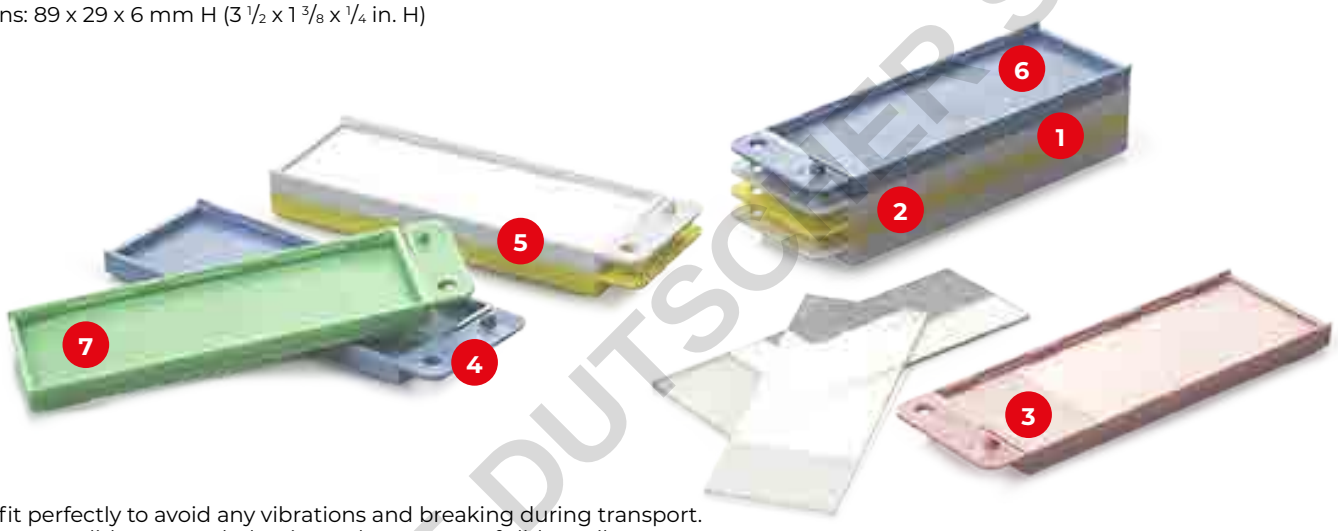

The UniMailer™ is a one-slide tray allowing the use of as many as necessary according to the number of slides to be mailed. Not only do they fit snugly on top of each other but they are also secured by an innovative locking mechanism. You may also want to insert a tamper evident tie or attach an ID label.

Designed to accommodate 25 x 75 mm and 1 x 3 in. slides with or without cover glasses, they can also be used to provide safe storage for those valuable slides you want to protect. It provides for multiple reuse or single use disposability.

Each tray allows placing the slide in a horizontal position for full visibility. Slides can easily be inserted with an exact fit to avoid any breaking during transport. When pressed on either side while in the UniMailer™, they will pop-up for easy removal.

Identification can be made on three sides or on top. Made of an almost unbreakable plastic, they are available in many popular pastel colors for easy identification. Packed in bag of fifty slide mailers. Will resist temperatures between -80 °C and +80 °C.

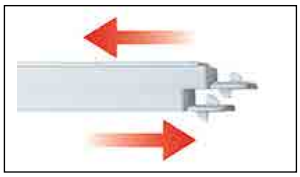

Dimensions: 89 x 29 x 6 mm H (3 1/2 x 1 3/8 x 1/4 in. H)

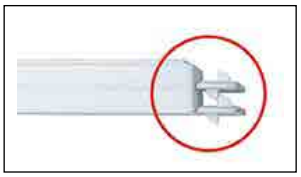

1- Slides fit perfectly to avoid any vibrations and breaking during transport.
2- Ship as many slides as needed, using only one type of slide mailer.
3- A special locking tab keeps UniMailer™ slide mailers securely in place.
4- Through holes, you can attach ID label or tamper evident tie.
5- Three writing surfaces for proper slide identification.
6- Strong plastic ensures rigidity and avoids any slide breakage.
7- Great for accessing one slide at a time while other slides are being kept well protected.

Cat. #	Color	Qty/Pk	Qty/Cs
M800-100B	Blue	50	200
M800-100G	Green	50	200
M800-100P	Pink	50	200
M800-100W	White	50	200
M800-100Y	Yelow	50	200

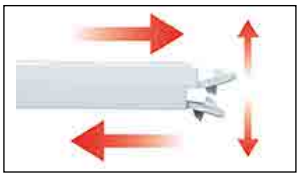

Not only do UniMailer™ slide mailers fit snugly on top of each other but are secured by an innovative locking mechanism.

To close, slide upper UniMailer™ forward until locking pins are engaged.

Locking mechanism is now functional.

To open, insert finger between two locking tabs and slide back upper UniMailer™.

The UniMailer™ is easy to use

Identify content by writing on sides.

Place slide in UniMailer™

Place another slide mailer on top and slide forward until a click is heard.

If desired, you can attach a tamper evident tie.

To open, slightly lift front tab to disconnect lock and slide back upper UniMailer™.

Press on slide to lift and remove.

DOMINIQUE DUTSCHER SAS

M961 HistoTainer™ II NON Tamper Evident Prefilled Specimen Containers, 50% Filled with a Choice of Fixatives

Container made of polypropylene / Closure made of polyethylene

Especially designed for collection, transport and storage of histology specimens, Simport® offers shatter resistant polypropylene containers, eliminating most problems of leakage and evaporation. Containers are manufactured from virgin, translucent polypropylene. The white lids are ribbed for easy opening when hands are wet or gloved while the jars are stackable for easy, safe storage. Jars are translucent and specimens can be viewed without having to open the lid. Closures are manufactured from virgin polyethylene with a unique integrated leak-resistant seal. Container's vertical walls offer excellent rigidity. For color coding purposes, use a Capinsert™ (see T345 Series) on top of closure. Ten different colors are available.

Both containers and caps are manufactured without the use of plasticisers or mold release agents. All materials used in manufacturing are free from latex. Containers are 95 kPa compliant. Available in many sizes from 20 to 120 ml. Packaging is offered in trays of 24, cases of 96.

The HistoTainer™ II is half filled with. 10% Neutral Buffered Formalin which penetrates quickly, but fixes slowly. The Formalin is enhanced by a buffering capacity optimizing histological results by light microscopy and immunohistochemistry.

DOMINIQUE DUTSCHER SAS

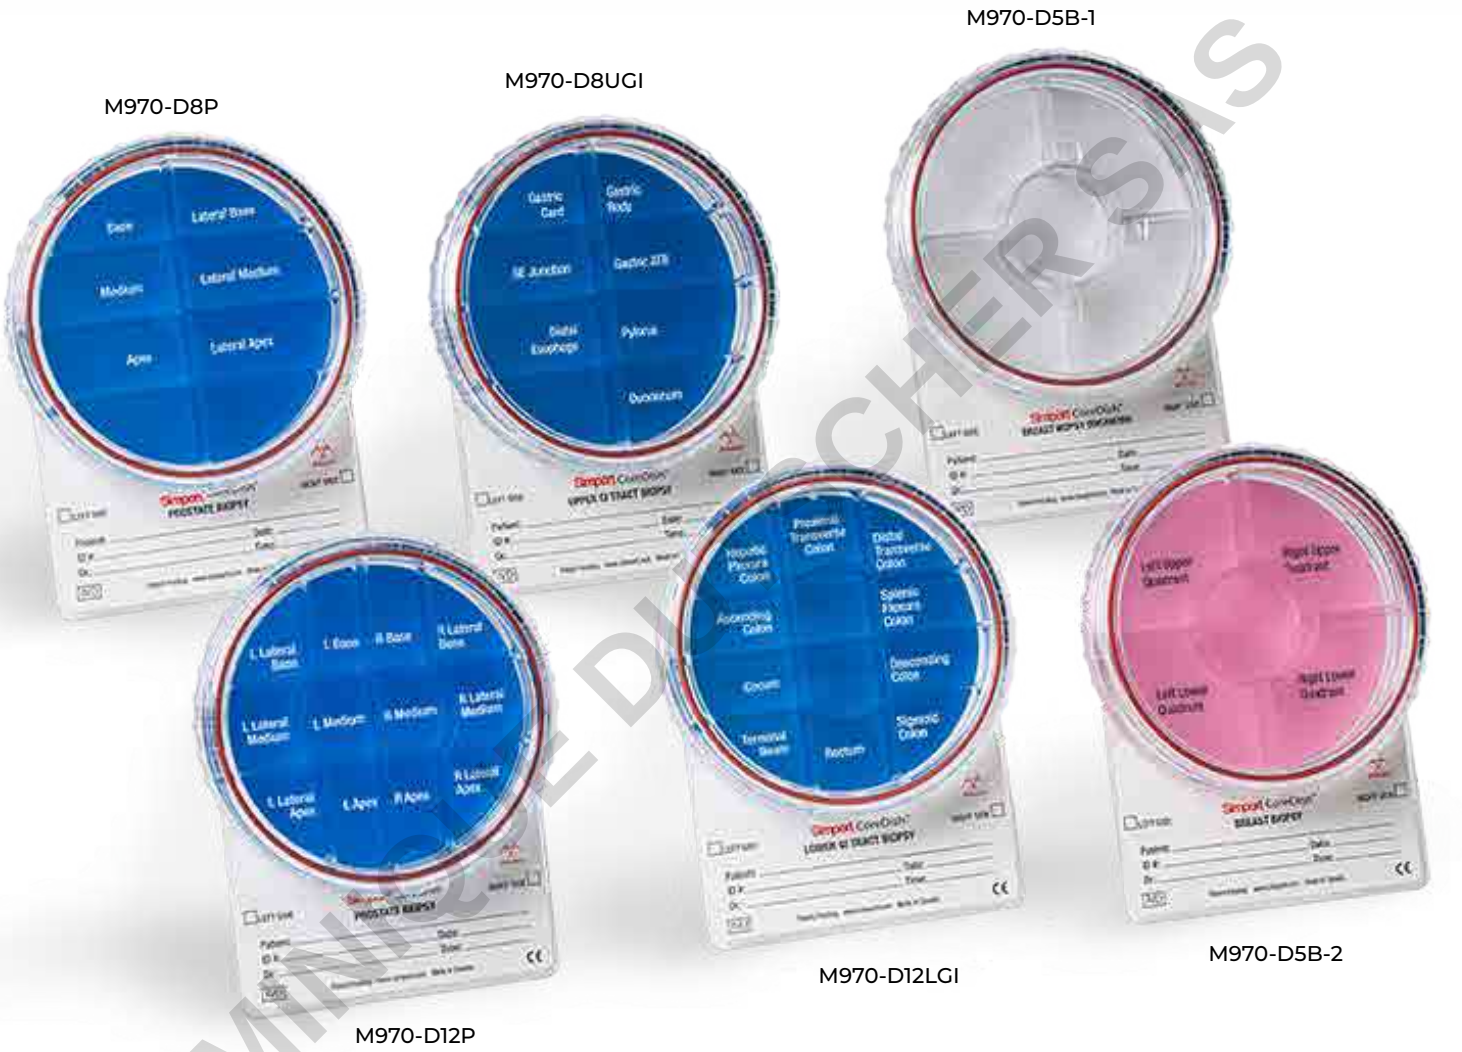

Containers

CoreDish®

Multiple Biopsy Coantainers

Half Prefiled with 10% Formalin

FOR IVD USE

DOMINIQUE DUTSCHER SAS

95 kPa TESTED

Made of polystyrene

Few recommendations concerning how the biopsies should be handled have been published. Performing a large number of biopsies means an increase in the number of containers handled and consequently a technical overload of the transmission network, which occurs without any financial counterpart. A new approach had to be developed in order to increase productivity.

Simport® is proud to offer a multi-compartment container in the shape of a dish and half prefilled with 10% Neutral Buffered Formalin, for holding and transporting biopsies. It is supplied with a leakproof closure with o-ring ensuring total protection of contents. The Simport® CoreDish® measures only 15 x 95 mm in diameter. Each compartment is clearly identified to allow proper placement and visualization of the biopsy being inserted. Thanks to the CoreDish® it is no longer necessary to use a multitude of individual containers, thereby reducing risks of confusion. The Simport® CoreDish® offers many configurations in order to hold different biopsies of the breast, prostate, upper GI tract and lower GI tract. A label allows essential information to be written such as patient I.D., doctor, date and time.

The CoreDish® is also available without formalin. See series M971.

Containers

M970-D5B-1 BREAST BIOPSY CONTAINER

FOR IVD USE

For separation, imaging and transport of core needle specimens

Designed specifically for radiography, separation, imaging and transport of core needle breast biopsies. Special absorbent liner keeps specimens moist (when saline solution is added) prior to radiography while helping to attenuate the x-ray beam. Four compartments are clearly identified (3, 6, 9 and 12) and the radiolucent numbers show up clearly on the radiograph. Formalin may be added prior to transportation to pathology for analysis. An area for writing patient information is provided on the label. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis. Not formalin prefilled.

M970-D5B-2 BREAST BIOPSY CONTAINER

FOR IVD USE

Simport® is proud to offer a multi-compartment container (out of five compartments, four are labelled: Left Upper Quadrant, Right Upper Quadrant, Left Lower Quadrant, Right Lower Quadrant) in the shape of a dish and half prefilled with 10% Neutral Buffered Formalin, for holding and transporting biopsies. Each compartment is clearly identified to allow proper placement and visualization of the breast biopsy being inserted. A writing area for patient information is provided. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis.

M970-D8P PROSTATE BIOPSY CONTAINER

FOR IVD USE

For prostate biopsies. Eight compartments. An area for patient information is provided. Six labeled compartments: Base, Lateral Base, Medial, Lateral Medial, Apex, Lateral Apex. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis.

M970-D8UGI UPPER GI TRACK BIOPSY CONTAINER

FOR IVD USE

For upper GI track biopsies. Eight compartments. An area for patient information is provided. Seven labeled compartments: Gastric Card, Gastric Body, GE Junction, Gastric ATR, Distal Esophage, Pylorus, Duodenum. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis.

M970-D12LGI LOWER GI TRACK BIOPSY CONTAINER

FOR IVD USE

For lower GI track biopsies. Twelve compartments. An area for patient information is provided. Ten labeled compartments: Proximal Flexure Colon, Hepatic Flexure Colon, Distal Transverse Colon, Ascending Colon, Splenic flexure Colon, Cecum, Decending Colon, Terminal Ileum, Rectum, Sigmoid Colon. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis.

M970-D12P PROSTATE BIOPSY CONTAINER

FOR IVD USE

For prostate biopsies. Twelve compartments. An area for patient information is provided. Twelve labeled compartments: L Base, R Base, L Lateral Base, R Lateral Base, L Lateral Medial, L Medial, R Medial, R Lateral Medial, L Lateral Apex, L Apex, R Apex, R Lateral Apex. Leakproof seal, thanks to o-ring lid, allows for safe and easy transport of the specimens from collection to analysis.

M750-20 SlideFolder™

Base made of high impact polystyrene / Hinged doors made of polystyrene

The SlideFolder™ will hold up to twenty standard microscope slides 75 mmx 25 mm (3 x 1 in.) and is made of two parts: a base holding the slides horizontally offering numbered spaces for easy identification, and transparent doors which can either cover the slides or be swung behind the SlideFolder™ for space saving purposes.

The base is available in 5 different colors, allowing color-coding classification of the slides. Each slide location is identified with a number from 1 to 20. Removal of slides is made easy simply by pressing on one end, which will automatically lift the other end.

The two transparent hinged covers offer a full view of each slide without having to remove it from its position in the SlideFolder™ and allows easy reading of ID labels with or without an optical barcode reader. All units are stackable and take minimum space on laboratory tables or shelves. Will resist temperatures between -80 °C and +80 °C. Not autoclavable.

M750-20W	White	10
M750-20Y	Yellow	10
M750-20AS (two of each color)	Assorted	10

Cat. #	Opaque doors	Qty/Cs
M752-20WOP	Opaque doors and white base	10

For light sensitive slides, use M752-20WOP SlideFolder™ with opaque doors.

For easier access to slides, simply swing the transparent hinged covers behind the SlideFolder™.

Easy slide removal by pressing down on one end and lifting it from the other.

M755-20 SlideTray™

Made of HIPS

The SlideTray™ is a convenient microscope slide holder made of heavy-duty plastic lasting many years even under the most adverse conditions. The SlideTray™ will hold up to 20 microscope slides in an almost horizontal position. Each slide can be easily removed and placed back in its position. The SlideTray™ is easily stackable and will take minimum space on any shelf or laboratory counter. Even when trays are stacked, slides are well protected and will not touch the tray above.

Dimensions: 206 x 299 x 18 mm H (8 1/8 x 11 3/4 x 11/16 in. H)

Cat. #	Color	Qty/Cs
M755-20W	White	10

Slides are easily inserted and removed.

Slide Storage

M700-50 SlideFile™ Jr. Storage System

Base made of high impact polystyrene / Cover made of polystyrene

The Junior model can hold up to 200 slides per unit in just 860 cm^3 (53 cu. in.) and is stackable for space efficient storage.Each SlideFile™ Jr. includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help slide classification and to minimize the possibility of sample mix-up.

The key to the SlideFile™ Jr. is a removable tray inside the storage box having fifty individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read barcodes without having to remove the slides from the box.

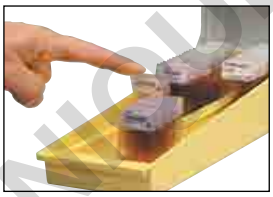

For space saving purposes, you can double the amount of slides simply by storing two slides per slot. And for maximum storage space, simply remove the tray and line up 200 slides in 3 rows for long term storage. Will resist temperatures between -80 °C and +80 °C. Not autoclavable.

Dimensions: 82 x 140 x 86 mm H (3 ¼ x 5 ½ x 3 ⅜ in. H)

Cat. #	Color	Qty/Pk	Qty/Cs
M700-50B	Blue	1	10
M700-50G	Green	1	10
M700-50P	Pink	1	10
M700-50W	White	1	10
M700-50Y	Yellow	1	10

Read barcodes without having to remove slides from tray.

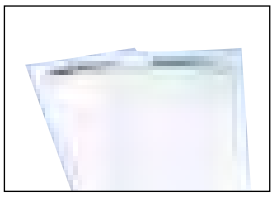

Simply tilt slides forward or backward with one finger to easily and rapidly pick up the one you need.

Remove slide tray and it will store up to 200 slides.

Removable tray makes it easy to carry slides around and store up to 50 slides vertically (1 per slot) or 100 slides vertically (2 per slot)

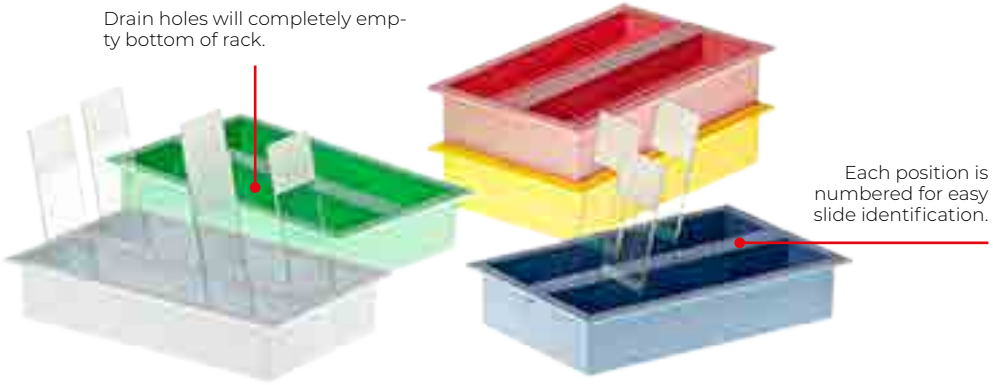

Two index cards numbered from 1 to 50 are supplied with each box.

M710-50 DrainRack™ Jr.

Made of high impact polystyrene

Can hold up to 100 microscope slides in 50 individual numbered slots. Will resist temperatures between -80 °C and +80 °C. Not autoclavable.

Cat. #	Color	Qty/Pk	Qty/Cs
M710-50B	Blue	1	10
M710-50G	Green	1	10
M710-50P	Pink	1	10
M710-50W	White	1	10
M710-50Y	Yellow	1	10

Dimensions: 75 x 125 x 25 mm H (3 x 5 x 1 in. H)

M700-100 SlideFile™ Storage System

Base made of high impact polystyrene / Covermade of polystyrene

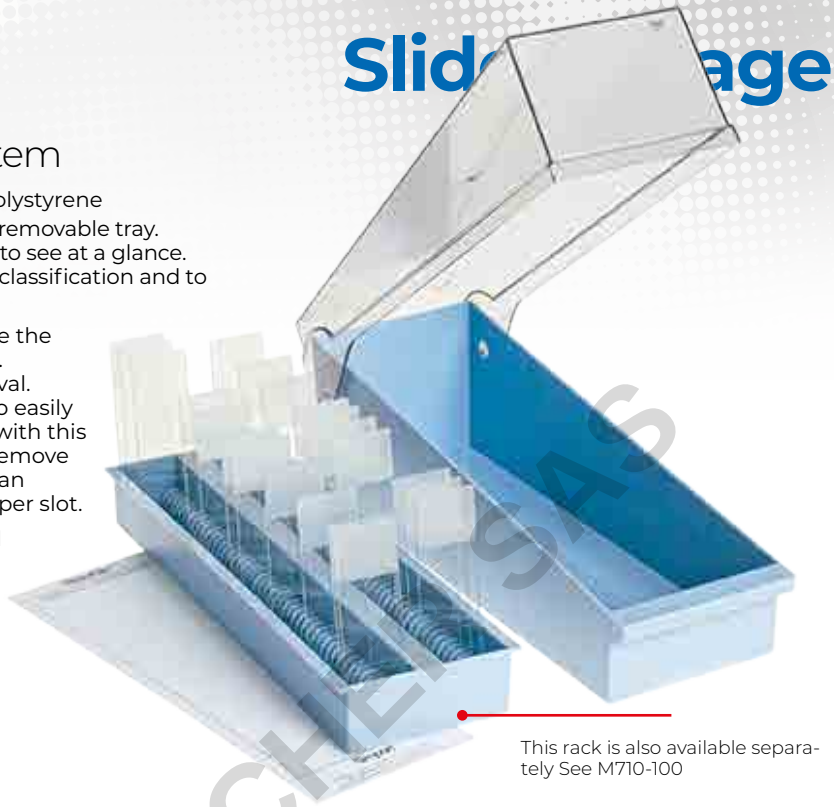

Each SlideFile™ Storage System includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help in slide classification and to minimize the possibility of sample mix-up.

The key to the SlideFile™ System is a removable tray inside the storage box having a hundred individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read barcodes without having to remove the slides from the box. For space saving purposes, you can double the amount of slides simply by storing two slides per slot.

For maximum storage space, simply remove the tray and line up 400 slides in 3 rows for long term storage. Will resist temperatures between -80 °C and +80 °C.

Not autoclavable.

Dimensions: 82 x 245 x 86 mm H (3 1/4 x 9 5/8 x 3 3/8 in. H)

This rack is also available separately See M710-100

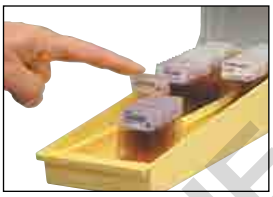

Cat. #	Color	Qty/Pk	Qty/Cs
M700-100B	Blue	1	10
M700-100G	Green	1	10
M700-100P	Pink	1	10
M700-100W	White	1	10
M700-100Y	Yellow	1	10

The most convenient, organized and versatile way of storing 75 x 25 mm or 3 x 1 in. microscope slides.

This impact resistant SlideFile™ Storage System can hold up to 400 slides per unit in just 1720 cm³ (105 cu. in.) and is stackable for space efficient storage.

Read barcodes without having to remove slides from tray.

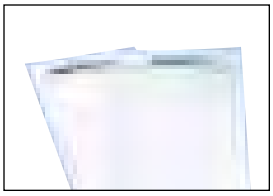

Simply tilt slides forward or backward with one finger to easily and rapidly pick up the one you need.

Remove slide tray and it will store up to 200 slides.

Removable tray makes it easy to carry slides around and store up to 50 slides vertically (1 per slot) or 100 slides vertically (2 per slot)

Two index cards numbered from 1 to 50 are supplied with each box.

M710-100 DrainRack™

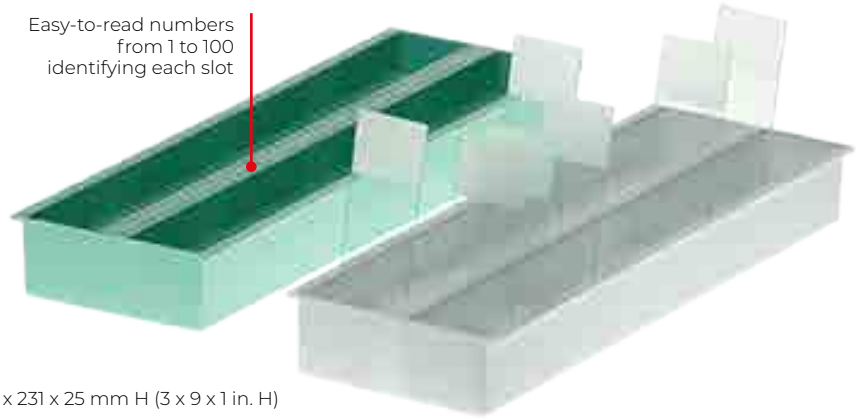

Made of high impact polystyrene

This rugged tray used as a drain rack can hold up to 200 microscope slides in 100 individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with the DrainRack™ is to be able to read barcodes without having to remove the slides from the box.

For space saving purposes, you can double the amount of slides simply by storing 2 slides per slot, giving you a capacity of 200 slides instead of 100.

Not autoclavable.

Easy-to-read numbers from 1 to 100 identifying each slot
