Technical Data Sheet

Description

- Hydrophilic polycarbonate membrane

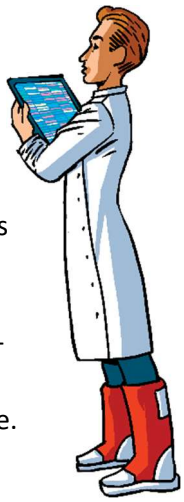

Part number

- 044202

Pieces by sales :

100 membranes

Description

The Isopore™ membrane is a polycarbonate, track-etched screen filter recommended for all analyses in which the sample is viewed on the surface of the membrane. Isopore™ membrane offers distinct advantages for the analysis of airborne contaminants and other particles using optical or electron microscopy. The Isopore™ membrane is composed of polycarbonate film, which has a smooth, glass-like surface for clearer sample observation. The unique manufacturing process of the membrane ensures a precise pore diameter and a consistent pore size for accurate separation of samples by size. Matched-weight filters are not usually required because of low, constant tar and ash weights.

Technical data

- Membrane: polycarbonate
- Pore size: 0,2 µm
- Diameter: 47 mm
- Hydrophilic
