MILLIPORE

Eight-Place Carrier Rack Assembly

For use with the Millipore MultiScreen® Assay System

DOMINIQ

What Is the Eight-Place Carrier Rack Assembly Used For?

The Millipore eight-place carrier rack assembly is a set of 12, eight-place carrier racks in a carrying tray. You use the carrier racks in the Millipore MultiScreen Assay System multiple punch assembly. They hold the sample collection containers in place.

There are three types of eight-place carrier racks available from Millipore; they are for:

- 7 mL vials
- 12 mm X 75 mm test tubes
- 4 mL vials

See the *Millipore MultiScreen Assay System User Guide* for more information on using the MulitScreen system.
