Milli-Q®
Lab Water

Data Sheet

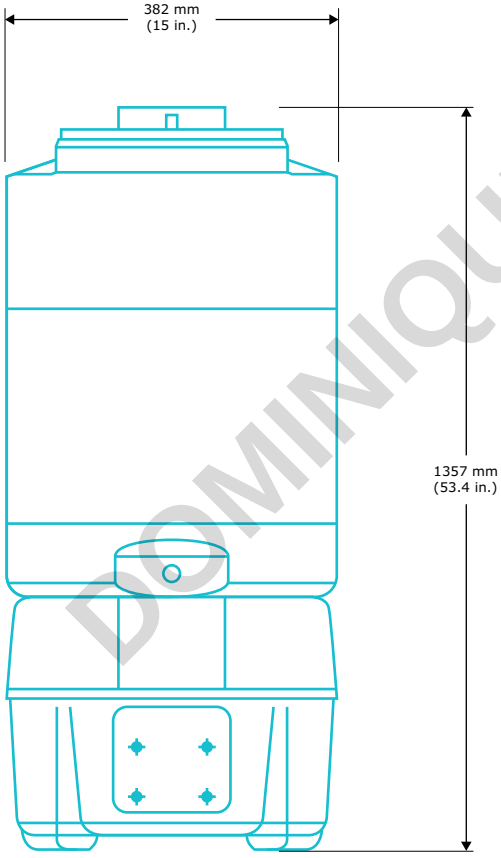

30 Liter Polyethylene Tank

(Cat. No. TANKPE030)

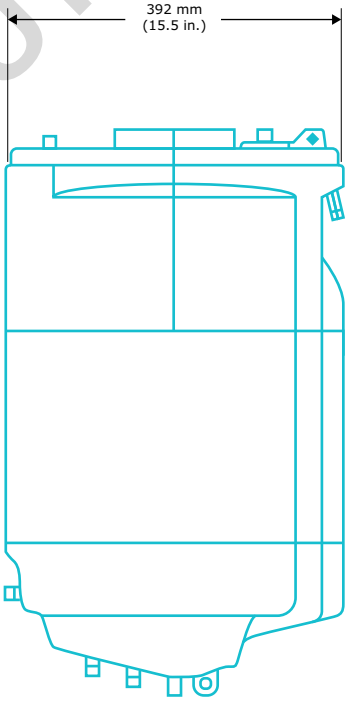

General Description

Purifying water is useless if the quality of the pure water degrades during storage. Merck's 30 L polyethylene (PE) tanks are designed to maintain consistent purity of the stored water and provide effective protection against airborne contaminants. A Millipak® vent filter can be installed on the tank to avoid contamination due to the air entering the tank.
