When downstream quality matters, make sure your upstream tools are the best.

Amicon® Ultra 2 mL Centrifugal Filters for Protein Purification and Concentration

DOMINIQUE DUTSCHER SAS

The Amicon® Ultra 2 mL filter provides a fast and easy way to concentrate, desalt and exchange the buffer for both proteins and nucleic acids. Now you can concentrate 2 mL down to 15 – 70 µL in an Amicon® Ultra centrifugal device.

By incorporating familiar Amicon® Ultra features such as the vertical membrane design and true dead stop, the Amicon® Ultra 2 mL filter delivers high recovery, short spin times and quality results even for the most dilute samples.

Amicon® Ultra 2 mL Advantages

- True engineered dead stop provides consistent recovery without spinning to dryness
- Reverse spin aids in sample recovery, especially with small, dilute samples
- Vertical membrane design aligns with the filtrate for less clogging and faster filtering
- Ultracel® low-binding membrane combines with the innovative vertical housing to provide fast sample processing without sacrificing recovery
- Fast processing, with 10- to 30-minute spin times

EMD Millipore is a division of Merck KGaA, Darmstadt, Germany

Easy to Choose!

Select the Amicon® Ultra Filter that best meets your sample needs. Choose your starting volume, identify the molecular weight of your molecule of interest, and identify final volume expected.

Amicon® Ultra Centrifugal Filters

Product	Amicon® Ultra-0.5	Amicon® Ultra-2	Amicon® Ultra-4	Amicon® Ultra-15
Maximum initial sample volume (mL)	0.5	2	4	15
Final concentrate (retentate) volume (µL)	15 – 20	15 – 70	30 – 70	150 – 300
