# DURAN® Watch Glass Dish, fused rim, Ø 100 mm

- Complies with DIN 12341
- Manufactured from borosilicate glass 3.3
- Reduced risk of injury due to fused rim
- Heat resistant

Catalog Number: **213214606**

## Product Overview

The multitude of different work steps in the laboratory environment demands a multitude of universally applicable glassware. These glass devices usually have a very simple shape and are characterized by their versatility. Watch glasses, for example, are concave curved. The small trough created in this way allows liquids or solids to be filled in.
