

DOMINIQUE DUTSCHER SAS

KIMBLE® KONTES® Valved 5mm NMR Tube, 7", >360 MHz

- Manufactured from borosilicate glass 3.3
- KONTES HI-VAC valve maximizes sample recovery
- Greaseless valve features a borosilicate glass body and PTFE plug so that the sample is always in contact with inert materials
- Rotationally symmetrical design, with two lateral ports located near the valve seat, permits use at higher temperatures
- FKM O-Ring seal is used to connect the valved NMR tube to a vacuum system
- Suitable for use in instruments with field strengths greater than 360 MHz
