

Cole-Parmer®

Cole-Parmer® Tube Rollers, RS-200 and RS-200D

- Multiple rollers saves bench top space and meets standard lab throughput needs
- Featuring removable side panels
- Featuring detachable roller tubes enabling large volume/diameter bottles to fit
- Choice of analogue or digital control
- Greater capacity, ideal for busy large throughput labs, and time saving
- Choice of fixed or variable speed

6 Tube Roller RS-200

6 Tube Roller RS-200D

Cole-Parmer® Tube Rollers, RS-200 and RS-200D

Cole-Parmer® roller mixers provide a gentle but efficient mixing ideal for mixing blood samples, viscous substances and liquid-solid suspensions where minimum aeration is required. Cole-Parmer® is committed to providing the highest levels of usability and as such has added additional features to the roller mixers. RS-200 roller mixers now feature easy to remove side panels. The side panels provide the user with complete peace of mind that their sample will be mixed effectively during continued use. The side panels ensure the sample bottles do not slide off the mixer during use and therefore provide the highest levels of both safety and functionality.

The roller tubes on Cole-Parmer® roller mixers conveniently detach to accommodate larger vessels and therefore allow the user to mix a wide variety of differently sized tubes and bottles. Cole-Parmer® roller mixers provide the highest levels of versatility as any of the roller tubes can be removed meaning the user can choose the arrangement depending on their needs.
