

New Corning® Lambda™ EliteTouch™ Single- and Multi-channel Pipettors

Product Information:

- 7 single-channel models up to 1000µL; 8 multi-channel models up to 300µL; 1 Starter Pack
- Very low weight, pipetting and tip ejection forces for high level ergonomics
- 4-digits counter located on the front of the handle for volume set visibility
- Convenient volume setting with auto-lock system (locks with first pipetting step) for user comfort
- Single-channel pipettors compatible with narrow tubes, retracting shafts in multi-channels for easier tips loading
- Additional colored pipetting buttons for user/application identification for sample safety (lower risk of cross contamination)
- User-friendly in-lab recalibration system, calibration tool provided with every pipettor
- Warranty: 3 years, provided with individual QC Certificate
- Wide tip compatibility for user flexibility of handheld tips choices

Applications:

- Manual forward and reverse pipetting
- Sample preparation, DNA/RNA, PCR, qPCR, sequencing and ELISA

Target customers:

- Pharma and Biotech, Industry, Research, Clinical Diagnostics
- Any customer who values ergonomics, high performance and sample safety

Prospecting:

- Customers performing long pipetting series and looking for ergonomic solutions to prevent RSI
- Customers looking to replace their current set of pipettors
- Customers buying our tips, tubes, plates
