EZ-Fit™ Filtration Units:
Convenience without compromise

The life science business of Merck operates as
MilliporeSigma in the U.S. and Canada.

MERCK

Microbial testing won't be a burden when you use EZ-Fit™ Filtration Units. The sterilized, disposable filtration devices for bioburden testing streamline your workflow, save time and give you highly reliable microbial enumeration results. It is simple to do: filter your liquid sample, then transfer the membrane onto an agar plate or add liquid media from an ampoule to culture the captured organisms.

The EZ-Fit™ pink units come with a wide range of membranes from 0.22 to 0.8 µm for maximum versatility to suit all applications. The new, patented drain design speeds up processing turbid and hard-to-filter matrices.

The EZ-Fit™ blue units give you extra flexibility: after filtration, either transfer the membrane to an agar plate or add liquid media and convert the device into a Petri dish.

Both EZ-Fit™ Filtration Unit types are available in different variants to suit any application:

- 100 mL or 250 mL funnels
- Black or white, gridded or plain membranes, made of mixed cellulose esters or PVDF (polyvinylidene fluoride)
- Bagged individually, in multipacks of 4 units (pink version only) or packaged in bulk (with or without protective bag)

results you can count on

Ready-to-use filtration units for microbial enumeration

Designed for optimal microbial recovery

The EZ-Fit™ Filtration Unit is designed for optimal recovery. The **blue and pink drain support** and the funnel-to-base assembly have been optimized so that the membrane remains perfectly flat after sample filtration. When transferred to the culture medium, the whole filtration surface of the membrane stays in perfect contact with the culture media. There's no folds, so optimal microbial recovery is ensured. The funnel's shape and the properties of its hydrophobic material **minimize sample residue**, ensuring that the complete sample volume reaches the membrane surface.

The innovative funnel assembly design **prevents leakages and liquid sample from by-passing** the membrane.

The EZ-Fit™ Filtration Units **conform to international standards** (EP/USP/ISO standards) and comply with water testing regulations.

Funnel design minimizes residual liquid and prevents sample by-pass

Drain support ensures membrane shape for perfect contact with media and optimal microbial recovery

Less risk of contamination

The filtration device you use should help to protect your sample from contamination during processing. The EZ-Fit™ Filtration Unit's design reduces the risk of accidentally touching the membrane filtration area with the forceps during membrane transfer and allows you to filter with the lid in place.

A rim stops the forceps from coming into contact with the membrane filtration area

Vented lid on the device during filtration

Units can be stacked to save space in the work area

Your workflow constantly in mind

Merck works with membrane filtration users around the world and across industries to make the EZ-Fit™ Filtration Unit ever more ergonomic and convenient, resulting in a device that sets the benchmark for ease of use.

- The **transparent funnel** allows you to see when filtration is complete from any angle.
- Thanks to **all-around filling level indicators** there is no need to turn the funnel when placing it on the filtration sup port.
- The shape of the membrane base makes **transferring the membrane** with the forceps easy.
- The unit's design allows the funnel to be removed with one hand.
- For larger volume samples, 250 mL funnels are the ideal choice.
- The units are **stackable**, saving space in the work area.

Convenient see-through funnel and all-around volume indications

EZ-Fit™ Manifold: The perfect fit

Quick-fit connections for the vacuum tubing and a low manifold level make sterile filtration more convenient than ever before. The special filtration head for fitting the EZ-Fit™ Filtration Unit allows the funnel to be removed with only one hand. The EZ-Fit™ Manifold's interior is easy to access for cleaning, so you can be confident that every filtration process is contamination-free. Each component can be removed by hand and autoclaved.

One handed funnel removal

The EZ-Fit™ Filtration Unit fits perfectly to the manifold

Smart transformation: Usable with liquid media in ampoules

After the sample filtration step, the membrane is usually transferred to agar media for cultivation. Alternatively, if using blue base units, **liquid media** can be added from the top, so there is no need to transfer the membrane. Simply remove the funnel, whereby the unit converts into a **Petri dish**, ready for incubation.

Liquid media

Petri dish

Technical specifications

Material of construction	Cover	Polystyrene
	Funnel	Styrene butadiene copolymer (SBC)
	Membrane	Mixed cellulose esters, PVDF
	Support pad (blue units only)	Cellulose
	Base	Acrylonitrile butadiene styrene
Dimensions	Plug (Bulk blue units only)	Low-density polyethylene
	Height	100 mL: 66.5 mm (2.6 in.)
		250 mL: 108.5 mm (4.3 in.)
	Largest diameter	75.8 mm (3.0 in.)
Filtration surface	12.56 cm ²	
Sterilization method	EO for blue units, e-beam irradiation for pink units	

Ordering Information

Filtration Units, Hardware and Accessories

Description	Qty / pack	Packaging / Format	Article number
PINK base – no pad			
EZ-Fit™ Filtration Unit, white plain PVDF membrane, 0.45 µm, 100 mL	48	Single	EFHVV10IS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.45 µm, 100 mL	48	Multipack of 4 units	EFHAW10MS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.45 µm, 250 mL	48	Bulk with protective bag	EFHAW25BS
EZ-Fit™ Filtration Unit, black gridded MCE membrane, 0.45 µm, 100 mL	48	Multipack of 4 units	EFHAB10MS
EZ-Fit™ Filtration Unit, black gridded MCE membrane, 0.45 µm, 250 mL	48	Bulk with protective bag	EFHAB25BS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.22 µm, 100 mL	48	Multipack of 4 units	EFGSW10MS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.22 µm, 100 mL	48	Single	EFGSW10IS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.8 µm, 100 mL	48	Bulk with protective bag	EFAAW10BS
EZ-Fit™ Filtration Unit, white gridded MCE membrane, 0.8 µm, 250 mL	48	Bulk with protective bag	EFAAW25BS
EZ-Fit™ Filtration Unit, black gridded MCE membrane, 0.8 µm, 100 mL	48	Bulk with protective bag	EFAAB10BS
EZ-Fit™ Filtration Unit, black gridded MCE membrane, 0.8 µm, 250 mL	48	Bulk with protective bag	EFAAB25BS
