VOYAGEUR Range - Technical features

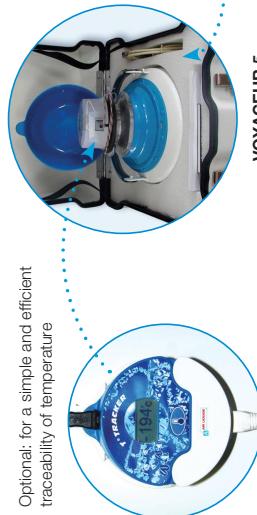

Dry shipper containers for storage and transport of biological samples in straws and cryo-vials

Class IIa Medical Device – Code GMDN 16534

T° TRACKER C

► Optional: for a simple and efficient traceability of temperature

- Samples shipped in dry phase: liquid nitrogen is trapped as micro-droplets in a porous material; samples are in nitrogen gaseous phase
- In compliance with international regulations for the transport of hazardous goods by road (ADR), air (IATA) and train (RID)
- Lightweight and resistant thanks to their aluminium design
- Different storage solutions (boxes and racks)
- 6-year vacuum warranty

- ⁽¹⁾Assessment of static holding times are done in agreement with conditions described within ISO 21014: norm extrapolated to assessed volume according to fluoroptic models. Daily evaporation and static holding time at 20°C, 10°C into immobile container and sealed stopper. These values are nominal and can vary according to history of the container and manufacturing ranges.

Regulatory Information

Inventories VOYAGEUR PLUS

1) Medical Devices :

Products identified within the catalogue as medical devices - except for straws, cryo-vials, bags and goblets for which Cryopal is not the manufacturer
- are regulated health products manufactured by Cryopal with CE marking in the context of directive 93/42/CEE.

Notified body: LNE - **CE** 0459

Classification: depending on the product.

CRYOPAL (Groupe Air Liquide)

Parc Gustave Eiffel
8, avenue Gutenberg
77607 Marne-la-Vallée
France

For proper use of equipment we suggest you refer to the instructions in the users manuals.

Carefully read operating instructions before use.
Instructions for use are available on Cryopal website (<http://www.cryopal.com>) - instructions for use provided in paper format within 7 calendar days.

2) Equipment vigilance :

With ISO 13485 certification (version 2012), Cryopal has implemented a specific organisation for the monitoring of incidents related to the use of Medical Devices and their traceability.

In the context of the enforcement of the Public Health Code for Medical Devices and equipment vigilance (Article R 522-1, article R 522-16), the manufacturer, the user or any third party are obliged to inform the supervisory authority of any incident or risk of incident implicating the Medical Device.

Since more than 50 years, Cryopal has been manufacturing a full range of cryopreservation vessels and super insulated vacuum lines in France dedicated to biospecimens storage and transport.

As one of the leaders in cryopreservation, Cryopal provides fully compliant and reliable solutions for your fragile and valuable applications.
