

Amersham™ Protran 0.1 NC nitrocellulose Western blotting membranes

A versatile nitrocellulose blotting membrane with 0.1 µm pore size.

Overview

A versatile nitrocellulose blotting membrane with 0.1 µm pore size.

- Low background and excellent signal-to-noise ratios.
- Compatible with a variety of labeling and detection systems.
- High binding capacity of small proteins (< Mr 10 000) reduces risk of "blow-through".
- Proprietary nitrocellulose formula gives a long shelf life of bound proteins.
- Available in popular precut sizes for laboratory application.

Excellent sensitivity, resolution and low background

Amersham Protran offers excellent sensitivity, resolution and low background, especially when used with Amersham ECL, Amersham ECL Prime, or Amersham ECL Select Western blotting systems.

Western blotting sandwiches

For convenience, Western blotting sandwiches (10 sandwiches/package) are available, consisting of precut Amersham Protran 0.1 NC membranes preassembled with 2 x 3 mm Chr blotting papers.
