

DOMINIQUE DUTSCHER SAS

**Whatman™ Grade 93 Qualitative Filter Papers**

Intermediate in speed and retention between Grades 1 and 4.

**Overview**

Intermediate in speed and retention between Grades 1 and 4.

These extremely strong filter papers have a high wet strength due to the addition of a small quantity of chemically stable resin. Normal qualitative applications will not introduce any significant impurities into the filtrate. The resins do, however, contain nitrogen so these grades should not be used in Kjeldahl estimations, etc. Some wet strengthened grades are available in folded (prepleated) forms.

Available in a dispenser pack, which can be attached to the wall or bench, placed on a shelf either upright or flat, and used as a normal carton or as a convenient dispenser. The envelopes are released individually for easy one-at-a-time removal. Package and envelopes are clearly marked for size and content.

Product 1093-6212: Discontinued. No new products will be manufactured after 30th September 2017. No alternative is available.

**Product specifications**
**Whatman™ Grade 93 qualitative filter paper, wet-strengthened, circle, 110 mm (50 envelopes of 25 circles) (1250/Pk)**
