Whatman™ Qualitative Filter Papers, Fluted, Grade 2V

Pre-folded filter paper offering higher loading capacity and faster filtration. Ideal for laboratory applications.

Overview

Compared with quadrant-folded filters, Cytiva's Whatman Grade 2V pre-folded filter paper exposes extra surface area, which enables a higher loading capacity and shorter filtration time.

- Medium flow and nominal particle retention rating of 8 µm
- Herzberg filtration speed of 240 s
- Fluted (pre-pleated) for easy use with conical filter funnels
- Can be used for soil analysis or general filtration

Cytiva business offers a broad range of Whatman qualitative filter papers, including standard filter grades and wet-strengthened grades.

Pre-folded filters for seed and soil testing

Grade 2V pre-folded filter sheets are suitable for extracting samples from soil to support contaminant testing in the presence of weakly acidic solutions.

Looking for a filter paper, membrane filter, or syringe filter? Let Cytiva help you find the optimal filter for your needs to ensure reliable analysis.

Product specifications
Whatman™ Grade 2V qualitative filter paper, fluted, pre-folded for analysis, 400 mm circle (100/Pk)

Catalog code	1202-400
Diameter	400 mm
Pack size	100/Pk

Format	Circles
Grade	Grade 2V
Material	High-quality cotton linters
Basis weight	97 g/m²
Nominal thickness	190 µm
Grade Type	Folded (Prepleated)
Particle Retention in Liquid Max.	8
Properties	Medium to slow, wet strength
Typical thickness	750
