Technical Data Sheet

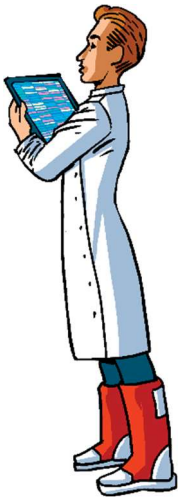

Description

- Whatman Quantitative Filter Papers, Ashless, Grade 41

Part number

- 1441125

Pieces by sales : 100

Description

- Grade 41 Fast Ashless Filter Paper, 125 mm circle (100 pcs)
- Format : Circles
- Dimensions : 125 mm
- Cytiva's Whatman Grade 41 environmental pollution papers are among the fastest filter papers in the Whatman ashless range. This gravimetric filter is well suited for quantitative analysis of soil and air.
- Extremely low ash content (0.007% ash maximum)
- 20 µm nominal particle retention rating
- Fast filtration speed (Herzberg 54 s)
- Commonly used for routine air pollution analysis and soil pollution analysis
- Aside from Grade 41 environmental pollution papers, Whatman quantitative paper comes in a variety of particle retentions, filtration speeds, and filter thicknesses to provide you with the appropriate filter for your precipitate. Also see our hardened ashless grades for analysis requiring the use of strong acids or bases.
