

SDS and native PAGE, IEF kit

Overview

With this kit you can cast homogeneous or gradient polyacrylamide gels (260 x125 x0.5 mm) for SDS PAGE, native PAGE and IEF. Gels can be cast with or without sample wells. Sample application strips and paper pieces are included as well as cellophane sheets for convenient preserving of the gel. GelBond PAGfilm is an optional accessory that allows casting of gels on a plastic backing.
