

DOMINIQUE DUTSCHER SAS

Conductivity Flow Cell, 1/16"

Overview

No overview available for this product.

Product specifications
Conductivity Flow Cell, 1/16"

Catalog code	18111105
Operating pressure max.	50 bar (5 MPa) (725 psi)
Volume	14 µl
Connections	UNF 10–32 2B ”Fingertights” with capillary tubing 1/ 16" outer diameter
Wetted Part	Yes

Wetted Materials	Titanium (Ti) Chlorotrifluoroethylene (CTFE)
Chemical stability	The wetted parts are resistant to organic solvents and salt buffers commonly used in chromatography of biomolecules, except 100 % Ethyl acetate, 100 % Hexane and 100 % Tetrahydrofuran
pH Stability Short Term	1–14
Material	Titanium (Ti) Chlorotrifluoroethylene (CTFE)
