

## **Amersham Protran 0.45 NC nitrocellulose Western blotting membranes**

Nitrocellulose (NC) membrane for use in Western blot protocols, offering low background and high signal-to-noise ratios.

Amersham Protran 0.45 NC is a nitrocellulose membrane with a 0.45  $\mu\text{m}$  pore size for use in Western blot protocols.

- Low background and excellent signal-to-noise ratios
- Compatible with a variety of labelling and detection systems
- High binding capacity
- Suitable for proteins with a wide range of molecular weights
- Ideal tool for your antibody purification and analysis workflow
- Proprietary nitrocellulose formula ensures a long shelf life of bound proteins

## **Product Specifications**

Amersham Protran 0.45 NC 300mm×600mm 5/PK

<b>Parameter</b>	<b>Amersham Protran 0.45 NC 300mm×600mm 5/PK</b>
Material	Nitrocellulose (NC)
Pore Size	0.45 µm
Application	Western, Southern and Northern Blotting
Binding Capacity	115-125 µg IgG/cm <sup>2</sup> (incubation method) 11-43 µg BSA/cm <sup>2</sup> (incubation method)
Autoclavable	Yes (steam autoclave)
Dimensions	300x600mm
Pack size	5
