SECTION 4: First aid measures

· 4.1 Description of first aid measures

General information:

First aider needs to protect himself.

Immediately remove any clothing soiled by the product.

After inhalation:

Supply fresh air.

Seek medical treatment in case of complaints. In case of unconsciousness place patient stably in side position for transportation.

After skin contact:

Flush contaminated skijn with soap and plenty of water.

SECTION 5: Firefighting measures	
 5.1 Extinguishing media Suitable extinguishing agents: Use fire extinguishing methods suitable to surrounding content 	onditions.
 For safety reasons unsuitable extinguishing agents: Water with full jet. 5.2 Special hazards arising from the substance or mixture 	
Not combustible. Formation of toxic gases is possible during heating or in case of fire.	
Under certain fire conditions, traces of other toxic gases cannot be excluded.	
 5.3 Advice for firefighters Protective equipment: 	
Wear self-contained respiratory protective device. Do not inhale explosion gases or combustion gases.	
Additional information	ations
Dispose of fire debris and contaminated fire fighting water in accordance with official regula Prevent fire extinguishing water from contaminating surface water or the ground water syst	
SECTION 6: Accidental release measures	
 6.1 Personal precautions, protective equipment and emergency procedures Particular danger of slipping on leaked/spilled product. 	
Wear protective clothing.	
Avoid contact with eyes and skin. Product forms slippery surface when combined with water.	
Wear protective equipment. Keep unprotected persons away. • 6.2 Environmental precautions: Do not allow to enter sewers/surface or ground water.	
• 6.3 Methods and material for containment and cleaning up: Cover drains.	
Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdu	st).
Use neutralising agent. Dispose contaminated material as waste according to section 13.	
Ensure adequate ventilation. Dispose of the material collected according to regulations.	
6.4 Reference to other sections	
See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

SECTION 7: Handling and storage

· 7.1 Precautions for safe handling

Open and handle receptacle with care.

Apply the general protection and hygiene measures for the handling with chemicals.

Ensure good ventilation/exhaustion at the workplace.

Prevent formation of aerosols.

Store in cool, dry place in tightly closed receptacles.

Information about fire - and explosion protection:

Substance itself does not burn, tuning measures to environment

• 7.2 Conditions for safe storage, including any incompatibilities

- · Storage:
- · Requirements to be met by storerooms and receptacles:

Prevent any seepage into the ground.

Store only in the original receptacle.

· Information about storage in one common storage facility: Store away from flammable substances.

• Further information about storage conditions: Keep container tightly sealed.

• Storage class: 8 B

• 7.3 Specific end use(s) No further relevant information available.

SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

· Ingredients with limit values that require monitoring at the workplace:

CAS: 1310-73-2 Sodium hydroxide

WEL Short-term value: 2 mg/m³

· Additional information: The lists valid during the making were used as basis.

· 8.2 Exposure controls

- Appropriate engineering controls No further data; see section 7.
- Individual protection measures, such as personal protective equipment
- General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work.

- Avoid contact with the eyes and skin.
- Respiratory protection: Not necessary if room is well-ventilated.
- Hand protection

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

11.2 Information on other hazards

· Endocrine disrupting properties

None of the ingredients is listed.

SECTION 12: Ecological information

12.1 Toxicity

· Aquatic toxicity: No further relevant information available.

- 12.2 Persistence and degradability No further relevant information available.
- **12.3 Bioaccumulative potential** No further relevant information available.
- · 12.4 Mobility in soil No further relevant information available.
- 12.5 Results of PBT and vPvB assessment
- · PBT: Not applicable.
- · vPvB: Not applicable.

12.6 Endocrine disrupting properties

The product does not contain substances with endocrine disrupting properties.

- 12.7 Other adverse effects
- · Additional ecological information:

General notes:

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pHvalue harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous. Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

Observe local (country-specific) regulations and laws

This material and its container must be disposed of as hazardous waste. Dispose of contents/container in accordance with local/regional/national/international regulations.

Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Chemicals must be disposed of in compliance with the respective national regulations.
