

# Color Code Tapes, Time Tape (Spee-D-Tape, Timetape®)

Modified on: Mon, 9 Aug, 2021 at 2:15 PM

High Adhesion  
Water & Alcohol Resistant  
Latex Free  
Paper Material

Resistant meaning the tape will remain adhered to a surface if it comes into contact with water or oil. The printing or writing on the face of a tape may fade if wiped with a cleaning solution, but tape would remain adhered as well.

The temperatures are reflective of dry environments. Submersion in water or moisture on an application surface will interfere with adhesives.

If any adhesive residue remains on a surface (mostly unlikely). A solvent based commercial cleaner (like goo-gone), will work best.

Time® Tape is a premium grade flatback printable latex impregnated paper tape with solvent based removable adhesive. Tape should be stored in its original packaging in a cool, dry area away from direct sunlight and should be used within 12 months of date of shipment. Surfaces to which tape is applied should be clean, dry and free of grease, oil or other contaminants.

| <b>Environment &amp; Usage</b> |           |
|--------------------------------|-----------|
| Storage Temp (MIN):            | 72° F     |
| Storage Temp (MAX):            | 75° F     |
| Months Store:                  | 12 months |
| Min Use:                       |           |
| Max Use:                       |           |
| Low Service Temp:              | -10° F    |
| High Service Temp:             | 250° F    |
| Min Application Temp:          | 32° F     |
