

Biosart® 100 Nutrient Media

Microbiological Nutrient
Media for Filtration Units

Benefits

Some of the advantages you will benefit from when using Biosart® 100 Media:

Secure and Reliable

- Presterilized media
- Certificate of Quality for every batch
- In compliance with international standards
- Consistently recovery

Economical

- Ready-to-use
- Long shelf life

Description

The membrane filtration method is the suitable technique for microbiological analysis of pharmaceuticals, water, cosmetics, foods and beverages. The use of ready-to-use disposable units is optimal for these applications. The membrane filtration method is worldwide accepted and complies with International Standards.

Biosart® 100 Monitors have been specifically designed for the detection and enumeration of microorganisms in pharmaceuticals, cosmetics, food, beverages, water and other liquids. These sterile disposables with an incorporated membrane filter and cellulose pad are ready to use. After filtration, just remove the 100 mL funnel to convert the Monitor into a petri dish eliminating the need for membrane manipulation.

Biosart® 100 Nutrient Media

Each box of Biosart® 100 Nutrient Media contains 50 ampoules with sterile media, each with 2.5 mL and a lot certificate. The media comply with international regulations and recommendations: International pharmacopoeias, DIN and ISO standards, the American Standards for Water and Foods, mineral water regulations, guidelines of the food and beverage industries.

Product Improvement

Biosart® 100 Nutrient Media are subject to continuous product improvement as part of our product development program to align our products with changing application requirements.

Technical Data and Order Information

Biosart® 100 Nutrient Media, 2.5 mL, individually sterile filled in plastic ampoules, 50 pcs.

¹The recommended Biosart® 100 Monitor Types are selected for optimum recovery of microorganisms on the corresponding nutrient media:

- 1) 16401: white membrane filter with black grid
- 2) 16402: green membrane filter with dark green grid
- 3) 16403: gray (after wetting black) membrane filter with white grid
