

Midisart® 2000

Ready-to-use filter for sterilizing gases and venting

Product Information

The Midisart® 2000 is the best choice for small-scale sterile air | gas filtration applications. Superior flow rates and seamless integration into single-use assemblies provide Midisart® customers with a distinct advantage that directly translates into cost savings. Individual 100% factory integrity testing verifies the quality of every filter prior to use. Moreover our new production-line with its enhanced capacity ensures a quick and reliable supply at any time.

Applications

Midisart® are excellent for

- Sterile venting of filling vessels and fermentation carboys, including culture vessels and CO₂ incubators (6 to 120 liters)
- Venting of holding tanks for sterile, distilled water and liquid culture media
- Autoclave venting
- In-line sterilization of and particulate removal from air and gases, such as sterilization of air for small fermenters

Flexibility

Midisart® 2000 were designed for maximum handling ease and safety. Tapered hose barbs ensure a simple and secure hold for 6- to 12-mm inner diameter tubing. Other connector types such as small hose barb (for tubings with 4 – 12 mm inner diameter), 8" NPT thread and TriClamp are also available. Midisart® is lightweight – only 20 g – so it will not weigh down or kink the tubing.

Reliability and safety

Midisart® 2000 is integrity testable and delivers reproducible results. The membrane is reinforced with polypropylene gauze, giving the Midisart® unit added stability and making it pressure resistant up to 3 bar | 44 psi. Midisart® 2000 entirely eliminates moisture breakthrough because of its inherently hydrophobic PTFE material. In addition, Midisart® is bio safe because all materi-

als of construction meet the requirements of the current USP Plastics Class VI testing. Midisart® 2000 units easily withstand at least 20 autoclaving cycles with no loss in performance.

Quality Control

Each Midisart® 2000 is tested by integrity prior to release. This 100% test has been defined as the final release criteria. The lot number and the individual unit number are lasered on the top part of each Midisart® 2000 housing to ensure complete traceability.

Performance

With a diameter measuring just 64 mm, Midisart® incorporates a filter area of 20 cm², which means that it is "packed" with high flow rate performance power. Midisart® multiply filtration performance in more ways than one.

Lot Number and Individual Unit Number

Lasered on the top part of each Midisart® - housing.

Integrity Testing

Midisart® 2000 filters can be integrity tested (Bubble Point Test, 60% IPA, BP_{min}. = 1.1 bar). The Midisart® Test Manifold (Order code 1Z-LB-0002) can be used to test 10 filters in parallel which simply leads to a reduction of test time by 90%.

Technical Data

Specifications

Materials

Membrane PTFE – reinforced with polypropylene gauze
Housing Polypropylene

Pore Sizes

0.2 µm
0.45 µm

Filtration Area

20 cm² | 3 square inch

Housing diameter

64 mm | 2,5"

Connectors

Hose Barb, 1/8" NPT, Triclamp, small Hose Barb

Biosafety

Materials pass current UPS Plastics, class VI
Non fiber releasing according to 21 CFR

Sterilization

Max. Temperature 134°C
Max. Autoclaving 60 Cycles
Not suitable for gamma irradiation
Gamma stable: see Midisart® BV
