DATASHEET | PART NUMBER 258245

ClearLine membranes filters

Naturally hydrophilic, nylon membranes are used for aqueous samples, alkaline or organic filtration of HPLC samples for their chemical resistance to alkaline solutions and solvents.

Membrane : NYL - Polyamide

Pore size (for Ø 47 mm) : 3,00 µm

Water flow @ 10 psi : 80-90 ml/min/cm²

Bubble point : 8-9 psi

Diameter : 47 mm

Non sterile

Colour : White, plain

Units :

100 membranes
