Stainless steel forceps

Ideal for handling and moving membrane to and from filter holders and Petri dishes

Overview

Stainless steel forceps, a Pall Life Sciences product, make filter handling easy with tips that have a flat, smooth surface to avoid membrane filter damage.

- Polypropylene finger grips provide a comfortable and secure hold.
- Choose traditional black or multi-colored finger grips. Bright colors make forceps easy to identify, track, and see on the lab bench.

Applications

- Ideal for handling and moving membrane to and from filter holders and Petri dishes.
