Amersham™ Solution dNTPs

Our dNTPs offer the highest purity deoxynucleotides available for DNA amplification, dideoxy sequencing, labelling, mutagenesis, complementary DNA (cDNA) synthesis, and protein expression profiling.

Overview

Our dNTPs offer the highest purity deoxynucleotides available for DNA amplification, dideoxy sequencing, labelling, mutagenesis, complementary DNA (cDNA) synthesis, and protein expression profiling.

- Free from DNase, RNase, and nicking enzyme activity.
- Buffer free and ready-to-use solutions in multiple formats.
- Custom formulation, testing, packaging, and labeling are available.

Functionally tested for long Polymerase Chain Reaction (PCR) and sequencing, with greater than 99% triphosphate purity (by HPLC) for optimum performance and consistency.

A Certificate of Analysis for each lot is available on request.

Product specifications
Amersham dNTP Set (100 mM each A,C,G,T)

Catalog code	28406553
Order Information	Custom formulation, testing, packaging, and labeling are available.
Purity	> 99% triphosphate
Physical State	Liquid
Concentration	100 mM
Color	Colorless
Kit contents	2'-Deoxyadenosine 5'-Triphosphate Solution; 2'-Deoxycytidine 5'-Triphosphate Solution; 2'-Deoxyguanosine 5'-Triphosphate Solution; 2'-Deoxythymidine 5'-Triphosphate Solution
Licensing	For licensing information, see the Licensing Statements page in the About Us section.
