

ClearLine membranes filters

RC membrane filters are hydrophilic and show a high chemical resistance to all solvents. They are very convenient for solvent filtration.

Membrane : RC – Regenerated cellulose

Pore size (for Ø 47 mm) : 0,45 µm

Water flow @ 10 psi : 30-48 ml/min/cm²

Bubble point : 10-15 psi

Diameter : 47 mm

Non sterile

Colour : White, plain

Units :

100 membranes
