Section 1 Safety Information

1.1 Safety Precaution

When used correctly, these units pose no health risk. However, these units can deliver dangerous levels of electricity and are to be operated only by qualified personnel following the guidelines laid out in this instruction manual. Anyone intending to use this equipment should read the complete manual thoroughly. The unit must never be used without the safety lid correctly in position. The unit should not be used if there is any sign of damage to the external tank or lid.

These units comply with the following European directives:

2006/95/CE Low Voltage Directive and 2014/30/UE (official Title 2004/108/EC) EMC Electromagnetic Compatibility

By virtue of the following harmonised standards:

BS EN IEC 61010-1: 2010 Safety Testing of Lab Equipment

BS EN IEC 61326-1:2013 EMC Electro Magnetic Compatibility

Cleaver
Scientific Ltd

Section 2 General Information

2.1 Packing Lists

MSMINI7, MSMINI10, MSMINIDUO

Units include tank, lid and electrodes and include the following accessories:

| | Tray | Tray Dams | Combs | Loading Guides | Cables |
|------------------|---------------------------------|------------------------|---------------------------------|---|---------|
| MSMINI7 | MS7-UV7 7 x 7cm (W x L) | MS7-UVDAM Pack of 2 | 2 x MS7-8-1 1mm, 8 sample | MS7-LG – Strips MS7-WP – Platform | CSL-CAB |
| MSMINI10 | MS7-UV10 7 x 10cm (W x L) | MS7-UVDAM Pack of 2 | 2 x MS7-8-1 1mm, 8 sample | MS7-LG – Strips MS7-WP – Platform | CSL-CAB |
| MSMINIDUO | MS7-UV7 MS7-UV10 | MS7-UVDAM Pack of 2 | 2 x MS7-8-1 1mm, 8 sample | MS7-LG – Strips MS7-WP – Platform | CSL-CAB |

MSMIDI7, MSMIDI10, MSMIDIDUO

Units include tank, lid and electrodes and include the following accessories:

| | Tray | Tray Dams | Combs | Loading Guides | Cables |
|------------------|-----------------------------------|-----------------------------|------------------------------------|---|---------|
| MSMIDI7 | MS10-UV7 10 x 7cm (W x L) | MS10- UVDAM Pack of 2 | 2 x MS10-16-1 1mm, 16 sample | MS10-LG – Strips MS10-WP – Platform | CSL-CAB |
| MSMIDI10 | MS10-UV10 10 x 10cm (W x L) | MS10- UVDAM Pack of 2 | 2 x MS10-16-1 1mm, 16 sample | MS10-LG – Strips MS10-WP – Platform | CSL-CAB |
| MSMIDIDUO | MS10-UV7 MS10-UV10 | MS10- UVDAM Pack of 2 | 2 x MS10-16-1 1mm, 16 sample | MS10-LG – Strips MS10-WP – Platform | CSL-CAB |

Cleaver
Scientific Ltd

MSCHOICE7, MSCHOICE10, MSCHOICE15, MSCHOICETRIO

Units include tank, lid and electrodes and include the following accessories:

| | Tray | Tray Dams | Combs | Loading Guides | Cables |
|---------------------|------------------------------------|-----------------------------|--|--|---------------|
| MSCHOICE7 | MS15-UV7 15 x 7cm (W x L) | MS15- UVDAM Pack of 2 | 2 x MS15-20- 1 1mm, 20 sample | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |
| MSCHOICE10 | MS15-UV10 15 x 10cm (W x L) | MS15- UVDAM Pack of 2 | 2 x MS15-20- 1 1mm, 20 sample | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |
| MSCHOICE15 | MS15-UV15 15 x 15cm (W x L) | MS15- UVDAM Pack of 2 | 2 x MS15-20- 1 1mm, 20 sample | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |
| MSCHOICETRIO | MS15-UV7 MS15-UV10 MS15-UV15 | MS15- UVDAM Pack of 2 | 2 x MS15-20- 1 1mm, 20 sample | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |

MSCHOICEST20, MSCHOICEST25

Units include tank, lid and electrodes and include the following accessories:

| | Tray | Tray Dams | Combs | Loading Guides | Cables |
|---------------------|--|-----------------------------|---|--|---------------|
| MSCHOICEST20 | MS15- UVST20 15 x 20 cm (W x L) | MS15- UVDAM Pack of 2 | 4 x MS15- 28MC-1 1mm thick, 28 sample MC | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |
| MSCHOICEST25 | MS15- UVST25 15 x 25 cm (W x L) | MS15- UVDAM Pack of 2 | 4 x MS15- 28MC-1 1mm thick, 28 sample MC | MS15-LG – Strips MS15-WP – Platform | CSL-CAB |

MSMAXI10, MSMAXI15, MSMAXI20, MSMAXIDUO, MSMAXI25

Units include tank, lid and electrodes and include the following accessories:

| | Tray | Tray Dams | Combs | Loading Guides | Cables |
|------------------|--------------------------------|-------------------------|---------------------------------|--|---------|
| MSMAXI10 | MS20-UV10 20 x 10cm (W x L) | MS20-UVDAM Pack of 2 | 2 x MS20-20-1 1mm, 20 sample | MS20-LG – Strips MS20-WP – Platform | CSL-CAB |
| MSMAX15 | MS20-UV15 20 x 15cm (W x L) | MS20-UVDAM Pack of 2 | 2 x MS20-20-1 1mm, 20 sample | MS20-LG – Strips MS20-WP – Platform | CSL-CAB |
| MSMAXI20 | MS20-UV20 20 x 20cm (W x L) | MS20-UVDAM Pack of 2 | 2 x MS20-20-1 1mm, 20 sample | MS20-LG – Strips MS20-WP – Platform | CSL-CAB |
| MSMAXIDUO | MS20-UV10 MS20-UV20 | MS20-UVDAM Pack of 2 | 2 x MS20-20-1 1mm, 20 sample | MS20-LG – Strips MS20-WP – Platform | CSL-CAB |
| MSMAXI25 | MS20-UV25 20 x 25cm (W x L) | MS20-UVDAM Pack of 2 | 2 x MS20-20-1 1mm, 20 sample | MS20-LG – Strips MS20-WP – Platform | CSL-CAB |

Packing list checked by _____

Date _____

The packing lists should be referred to as soon as the units are received to ensure that all components have been included. The unit should be checked for damage when received.

Please contact your supplier if there are any problems or missing items.

2.2 Care and Maintenance

Cleaning Horizontal Units

Units are best cleaned using warm water and a mild detergent. **Water at temperatures above 60°C can cause damage to the unit and components.**

The tank should be thoroughly rinsed with warm water or distilled water to prevent buildup of salts but care should be taken not to damage the enclosed electrode and vigorous cleaning is not necessary or advised.

Air drying is preferably before use.

The units should only be cleaned with the following:

Warm water with a mild concentration of soap or other mild detergent.

Compatible detergents include dishwashing liquid, Hexane and Aliphatic hydrocarbons

The units should not be left to in detergents for more than 30 minutes.

The units should never come into contact with the following cleaning agents, these will cause irreversible and accumulative damage:

Acetone, Phenol, Chloroform, Carbon tetrachloride, Methanol, Ethanol, Isopropyl alcohol

Alkalies.

Rnase Decontamination

This can be performed using the following protocol:

Clean the units with a mild detergent as described above.

Wash with 3% hydrogen peroxide (H₂O₂) for 10 minutes.

Rinsed with 0.1% DEPC- (diethyl pyro carbonate) treated distilled water,

Caution: DEPC is a suspected carcinogen. Always take the necessary precautions when using.

RNaseZAP™ (Ambion) can also be used. Please consult the instructions for use with acrylic gel tanks.

Section 3 Operating Instructions

Further information (including videos) regarding setting up and running the multiSUB® units can be found at
www.cleaverscientific.com

3.1 Usage Guidance and restrictions

- Maximum altitude 2,000m.
- Temperature range between 4°C and 65°C.
- Maximum relative humidity 80% for temperatures up to 31°C decreasing linearly to 50% relative humidity at 40°C.
- Not for outdoor Use.

This apparatus is rated POLLUTION DEGREE 2 in accordance with IEC 664.

POLLUTION DEGREE 2, states that: "Normally only non-conductive pollution occurs.

Occasionally, however, a temporary conductivity caused by condensation must be expected".

Cleaver
Scientific Ltd

3.2 Setting up the Horizontal Gel Tanks

Instructions for fitting Electrode Cables

1. Note the position of the lid on the unit. This shows the correct polarity and the correct orientation of the cables, black is negative and red positive.
2. Remove the lid from the unit. Note if the lid is not removed, fitting the cables may result in un-tightening of the gold plug and damage to the electrode.
3. Screw the cables into the tapped holes as fully as possible so that there is no gap between the lid and the leading edge of the cable fitting.
4. Refit the lid.

Instructions for fitting Loading Guides

These can be fitted to enhance visibility of the wells if desired. They can be fitted to the white vinyl platform sheet or to the unit itself.

1. Seat the tray in the unit and note the position of the comb grooves. The samples run black to red but the trays can be used forward or backwards so ensure that the comb grooves closest to the black electrode are marked.
2. Remove the tray.
3. Peel the back off of the loading guide and carefully apply the loading guide directly to the gel platform.

The unit is now ready to be used.

Cleaver
Scientific Ltd

3.3 Gel Preparation

1. Table 1 below shows the volume of agarose solution required to make the desired agarose gel for each unit tray size. For a standard 0.7% agarose gel, add 0.7 grams of agarose to 100 ml of 1x TAE or TBE solution. The same 1 x solution should be used in the tank buffer solution.

Table 1

| multiSUB® Mini | Tray | 7 x 7 cm | 7 x 10 cm | |
|-----------------------------|--------------------------------|------------|------------|------------|
| | Gel volume for a 5mm thick gel | 25 mL | 35 mL | |
| multiSUB® Midi | Tray | 10 x 7 cm | 10 x 10 cm | |
| | Gel volume for a 5mm thick gel | 35 mL | 50 mL | |
| multiSUB® Choice | Tray | 15 x 7 cm | 15 x 10 cm | 15 x 15 cm |
| | Gel volume for a 5mm thick gel | 52.5 mL | 75 mL | 112.5 mL |
| multiSUB® Choice STRETCH | Tray | 15 x 20 cm | 15 x 25 cm | |
| | Gel volume for a 5mm thick gel | 150 mL | 187.5 mL | |
| multiSUB® Maxi | Tray | 20 x 10 cm | 20 x 15 cm | 20 x 20 cm |
| | Gel volume for a 5mm thick gel | 100 mL | 150 mL | 200 mL |

2. Add the agarose powder to a conical flask.
3. Add the appropriate amount of 1x TAE or TBE solution from the table above. To prevent evaporation during the dissolving steps below, the conical flask should be covered with parafilm.
4. Dissolve the agarose powder by heating the agarose either on a magnetic hot plate with stirring bar or in a microwave oven. If using the microwave method, the microwave should be set at around a 400 watt or medium setting and the flask swirled every minute. The solution should be heated until all crystals are dissolved. This is best viewed against a light background. Crystals appear as translucent crystals. These will interfere with sample migration if not completely dissolved.

The gel must be cooled to between 50°C and 60°C degrees before pouring.

Cleaver
Scientific Ltd

3.4 Gel Pouring

The CSL Multi sub range of units allows three different methods of gel casting:

Casting Dams

Flexicaster

Traditional Tape

Using trays with Casting Dams

1. To fit the casting dams, place one casting dam on the bench with the groove facing upwards (see figure 1). Push the edge of the tray down firmly into the groove (see figure 2). Repeat this for the other side (figure 3). The dams should be fitted so that there is no gap between the sides of the tray and the groove in the dams. This will ensure that there is no possibility of gel leakage.
2. Place the comb(s) in the grooves. Each tray has more than one comb groove so that multiple combs can be used. Using multiple combs increases sample number available per gel but decreases run length and care must be taken to ensure that samples from the first wells do not migrate into the lanes of the second comb wells.
3. Pour in the agarose carefully so as not to generate bubbles. Any bubbles that do occur can be smoothed to the edge of the gel and dispersed using a pipette tip.
4. Allow the agarose to set, ensuring that the gel remains undisturbed.
5. Carefully remove the gel casting gates and comb and transfer the gel including tray to the main tank.

Figures 1 – 3 Assembling the casting dam to the tray

Figure 1

Figure 2

Figure 3

Cleaver
Scientific Ltd

Using The Flexicaster

See figures 4 and 5 for Flexicaster MS7-FC and MS20-FC

1. Level the Flexicaster base by adjusting the feet so that the bubble is exactly central.
2. Insert the desired length tray into the Flexicaster such that one end of the tray is pushed up and seals against the silicone mat of the permanent end of the Flexicaster.
3. Position the movable end of the Flexicaster so that the silicone mat is pushed against the other end of the tray.
4. Turn the cam so that the silicone mat tightly seals against the side of the tray. Pour in the agarose carefully so as not to generate bubbles. Any bubbles that do occur can be smoothed to the edge of the gel and dispersed using a pipette tip.
5. Allow the agarose to set, ensuring that the gel remains undisturbed.
6. Carefully remove the gel casting gates and comb and transfer the gel including tray to the main tank.

Figure 4 MS7-FC

Figure 5 MS20-FC

Using Traditional tape method

1. Autoclave or plastic backed general tape should be used. A length 5cm longer than the width of each end of the tray should be cut. One length should be placed over one end of the tray and stuck 1cm in from the tray edge. This should then be folded and the edges sealed securely. Repeat for the other end and place onto a level surface for gel pouring.
2. Place the comb(s) in the grooves. Each tray has more than one comb groove so that multiple combs can be used. Using multiple combs increases sample number available per gel but decreases run length and care

must be taken to ensure that samples from the first wells do not migrate into the lanes of the second comb wells.

3. Pour in the agarose carefully so as not to generate bubbles. Any bubbles that do occur can be smoothed to the edge of the gel and dispersed using a pipette tip.
4. Allow the agarose to set, ensuring that the gel remains undisturbed.
5. Carefully remove the gel casting gates and comb and transfer the gel including tray to the main tank.

3.5 Running the Gel

1. Mix the sample to be loaded with sample buffer – see solutions for common sample buffers. Usually 3ul of sample buffer is adequate but less may be used with sample volumes of less than 10ul.
2. Fill the unit with buffer until the gel is just flooded with buffer. This will give the fastest resolution times. For enhanced quality of resolution of sample, fill the unit to 5mm above the gel.
3. Load the samples into the wells using pipettes. Multi-channel pipettes can be used for loading samples with MC compatible combs, see listing in accessories for identification of these.
4. Carefully place the lid on the tank and connect to a power supply.
5. Typically gels are run at between 90 and 150 volts. However, maximum voltages are indicated on the serial badge of each unit. It should be noted that higher voltages generally give faster but poorer quality sample resolution.

3.6 Gel Staining and Viewing

The Multi Sub trays allow staining to be performed without removing the gel from the tray if this is preferred.

1. Transfer the gel to a vessel containing the appropriate volume of 0.5 µg/ml ethidium bromide stain for 15–30 minutes, see solutions for stock stain concentration and adjust to the volume used accordingly. The entire gel should be covered.

NOTE: Ethidium bromide is a suspected carcinogen and the necessary safety precautions should be undertaken.

2. De-stain the gel for 10–30 minutes in distilled water again ensuring the gel is completely immersed.
3. Rinse the gel twice for a couple of seconds with distilled water.
4. Transfer the gel to a UV Transilluminator.
5. The samples will often appear as brighter, clearer bands when photographed or viewed using a gel documentation system. However if the gel bands are too faint then the staining procedure should be adjusted so that there is less de-staining. If there is too much background then the staining procedure should be adjusted so that there is more de-staining.

3.7 Solutions

1x TAE 40 mM tris (pH 7.6), 20 mM acetic acid, 1 mM EDTA.

50x (1L) dissolve in 750 ml distilled water:

242 g tris base (FW = 121)

57.1 ml glacial acetic acid

100 ml 0.5 M EDTA (pH 8.0).

Fill to 1 litre with distilled water.

Cleaver
Scientific Ltd

1x TBE 89 mM tris (pH 7.6), 89 mM boric acid, 2 mM EDTA

10x (1L) dissolve in 750 ml distilled water:

108 g tris base (FW = 121)

55 g boric acid (FW = 61.8)

40 ml 0.5 M EDTA (pH 8.0)

Fill to 1 litre with distilled water.

Sample Loading Dye

10x sample buffer stock consists of 50% glycerol, 0.25% bromophenol blue, and

0.25% xylene cyanole FF in 1x TAE buffer. Only 1–10 ml of the 10x loading dye should be prepared.

Ethidium Bromide Solution

Add 10 mg of Ethidium Bromide to 1 ml distilled water.

Cleaver
Scientific Ltd

Section 5 Troubleshooting Guide

| Problem | Cause | Solution |
|---|---|---|
| Bands sharp but not enough bands seen | Gel agarose percentage too high Incomplete digestion | Decrease agarose percentage. Review enzyme activity, digest further. |
| Band smearing and streaking | Agarose has improper endosmosis Salt concentration in sample too high Excessive power and heating Sample spilled out of well Incomplete digestion, nuclease contamination, bad enzyme Sample wells cast through the gel. Sample leaks along bottom of running surface | Consult Cleaver Scientific about agarose. Reduce salt concentration to $\leq 0.1M$. Reduce voltage. See electrophoresis instructions. Apply sample carefully. Increase gel thickness for large sample volumes. Adjust comb height. Heat sample. Review enzyme activity. Digest sample further. Comb should be placed to 1 to 2 mm above the base of the running surface. |
| Curved line or distortion of bands | Bubbles in sample wells | Remove bubbles prior to electrophoresis. |
| Curved bands, smiles | Sample overload | Reduce load. |
| Differential relative mobilities | Sample spilled out of wells Unit not leveled | Samples should have proper density. Apply carefully. Level unit. Use a steady work bench. |
| Gels crack | Too high voltage gradient, especially with low melting temperature agarose or low gel strength gels | Reduce voltage. Run gel at lower temperature. |
| High MW bands sharp; low MW bands smeared | Gel agarose percentage too low | Increase agarose percentage. Switch to polyacrylamide. |
| Ragged bands | Sample density incorrect Sample well deformed Excessive power or heating | See sample application instructions. Carefully remove comb, especially from soft gels. Make sure gel has solidified. Cooling soft gels aids in comb removal. Reduce voltage. See electrophoresis instructions. |
| Slanted lanes (bands) | Gel not fully solidified Comb warped or at an angle | Gel to solidify for at least 30-45min. Check alignment of comb. |

6.3 Catalogue numbers and product descriptions for CSL Related Products

| Catalogue No. | Product description |
|-----------------|--|
| nanoPAC-300 | Mini Power supply, 300V, 400mA, 60W -100 -240VAC |
| nanoPAC-500 | Mini Power supply, 500V, 400mA, 120W -100 -240VAC |
| CS300V | omniPAC MIDI Power Supply, 300V, 700mA, 150 – 100 -240VAC |
| OmniDOCIPROSAFE | OMNIDOC-i plus Blue LED Epi-illumination Module (OMNIDOC-BL), and 520, 560 & 580nm filters (OMNIDOC-SYBR, -AF560 & -AF580); and White Light Table (OMNIDOC-WLT). Requires a PC, laptop or tablet with Wi-Fi connection |
| CSL-AG5 | Agarose Powder 5g, Low EEO |
| CSL-AG100 | Agarose Powder 100g, Low EEO |
| CSL-AG500 | Agarose Powder 500g, Low EEO |
| CSL-AG1000 | Agarose Powder 1000g, Low EEO (2x500g bottles) |
| CSL-AG2000 | Agarose Powder 2000g, Low EEO (4x500g bottles) |
| CSL-AG5000 | Agarose Powder 5000g, Low EEO (10x500g bottles) |
| CSL-AG10KG | Agarose Powder 10Kg, Low EEO (20x500g bottles) |
| CSL-LMA5 | Agarose Powder 5g, Low Melting Point |
| CSL-LMA50 | Agarose Powder 50g, Low Melting Point |
| CSL-LMA100 | Agarose Powder 100g, Low Melting Point |
| CSL-HRA100 | Agarose Powder 100g, High Resolution |
| CSL-HRA500 | Agarose Powder 500g, High Resolution |
| CSL-AGTAB | Agarose Tablet 100g, Low EEO (200 x 0.5g tablets, supplies as 20 blister packs of 10 x 0.5g tablets) |
| CSL-RUNSAFE | CSL-RUNSAFE - Package: 1 ml/vial |
| CSL-TBEP | Powdered Tris-Borate-EDTA Running Buffer- 10 sachets (1litre/pk) |
| TBE10X1L | Cleaver Buffer Tris-Borate-EDTA Running Buffer- 10 x 1L |
| TBE10X5 | Cleaver Buffer Tris-Borate-EDTA Running Buffer- 10 x 5L |
| TAE50X1L | Cleaver Buffer Tris-Borate-EDTA Running Buffer- 50 x 1L |
| TAE50X5L | Cleaver Buffer Tris-Borate-EDTA Running Buffer- 50 x 5L |
| CSL-MDNA-100BH | 100bp DNA ladder, 100 – 300bp, 1 x 500µl vial |
| CSL-MDNA-100BP | 100bp DNA ladder, 100 – 1500bp, 1 x 500µl vial |
| CSL-MDNA-1KB | 1Kb DNA ladder, 250 – 10Kb, 1 x 500µl vial |
| CSL-MDNA-50BP | 50bp DNA ladder, 50 – 1500bp, 1 x 500µl vial |
| CSL-MDNA-BR | Broad Range DNA ladder, 100bp – 10Kb, 1 x 500µl vial |
| CSL-MDNA-HR | High Range DNA ladder, 250bp – 25Kb, 1 x 500µl vial |
| CSL-LOADDYE | 10x Bromophenol Blue Loading Dye, 1mL |
| CSL-LOADDYE10 | 10x Bromophenol Blue Loading Dye, 10mL |
| SAFEVIEW | BLUE Light Transilluminator 21 x 21cm |
| CSLUVTS312 | UV Transilluminator, small 21 x 21 cm, 312nm |
| CSL-GELX4 | 4mm x 1mm, Gel Cutting Tips, 250/ bag |
| CSL-GELX4RACK | 4mm x 1mm, Gel Cutting Tips, 5 racks of 48 |
| CSL-GELX6.5 | 6.5mm x 1mm, Gel Cutting Tips, 250/ bag |
| CSL-GELX6.5RACK | 6.5mm x 1mm, Gel Cutting Tips, 5 racks of 48 |
| CSLQSPIN | Mini Centrifuge complete with 1.5/2.0 ml rotor, strip tube rotor, 0.5 and 0.4 ml adapters, 230V, Purple lid |
| CV20 | Cleaver Pipette - Volume; 2 - 20µl |

Section 7 Warranty

The Cleaver Scientific Ltd. (CSL) multiSUB® Horizontal Electrophoresis units have a warranty against manufacturing and material faults of twelve months from date of customer receipt.

If any defects occur during this warranty period, CSL will repair or replace the defective parts free of charge.

This warranty does not cover defects occurring by accident or misuse or defects caused by improper operation.

Units where repair or modification has been performed by anyone other than CSL or an appointed distributor or representative are no longer under warranty from the time the unit was modified.

Units which have accessories or repaired parts not supplied by CSL or its associated distributors have invalidated warranty.

CSL cannot repair or replace free of charge units where improper solutions or chemicals have been used. For a list of these please see the Care and Maintenance subsection.

If a problem does occur then please contact your supplier or CSL:
