Falcon® Pipet Controller

FALCON®
A Corning Brand

The light, ergonomic, motorized pipet controller is designed for use with glass and plastic serological pipets from 0.5 to 100 mL volume ranges. Conveniently positioned switches change operating modes and speeds quickly to handle different liquid volumes and viscosities.

Aspirating and dispensing speed is controlled through the finger triggers. When fully charged, the batteries enable up to 6 hours of continuous use. The large LCD display clearly indicates battery status, pipetting mode, and speed. The filters, pipet holder, and nose piece are autoclavable.

Features

- LCD display for continuous visualization of speed, modes, and battery status
- Well-positioned function buttons
- Comes with a universal power supply, 0.2 µm PTFE filter, a wall hanger, Li-ion battery set, and a charging stand (depending on version of the product)
