

# Certificate of Quality Assurance

We at Heathrow Scientific are committed to developing and manufacturing high-quality, industry-leading products for scientific research. We certify that the following product has been produced and inspected according to our standard quality assurance processes:

**Pour-Boat Weighing Dishes, White, Small  
Part Number HS1419A**

**Description of Quality Standard:** Vacuum-molded of polystyrene homopolymer with non-toxic white pigment, which are inert or minimally reactive with most common laboratory reagents. Inspected in the molding facility for cracks, incomplete or distorted shape, or other damage or defects which would compromise proper function. Sealed in polybags.

**BSE/TSE Statement:** Product is not manufactured or derived from and does not come in contact with materials of animal origin.

Made from FDA food-grade polystyrene

Our mission is to provide conscientiously designed and thoroughly tested products for laboratory professionals in the pure and applied sciences. We strive to maintain the highest quality standards and welcome all inquiries in this regard.

Nicole Smokowicz  
Quality Assurance Officer
