	Life Sciences	Document Number: LSR00040	Rev.: 8
Description (Class): Reference, Customer Technical Data Sheet – Conical Centrifuge Tubes, 15 mL PS w/cap		Page: 1 of 2	

APPLICATIONS:

- Cell Centrifugation: pelleting, separation by density gradients
- Molecular biology: e.g. centrifugation or pelleting bacterial cells for DNA isolation; purification & precipitation of nucleic acids
- Sample storage
- Centrifugation of precipitates

FEATURES:

Polystyrene construction

- Optically clear for easy viewing of sample
- Hydrophobic, biologically inert surface for good cell / protein recovery
- Stable from 4°C to 60°C
- Can withstand centrifugal forces up to 1800 rcf

Conical Design:

- Fits most standard floor model and table-top centrifuges, including many biohazard contained models

Dome seal screw on closure:

- Biologically inert, high density polyethylene provides a chemically resistant surface
- Double threaded to reduce cross-threading
- Interface/plug sealing ring retains liquid during routine laboratory procedures

Dark blue graduations in 0.5 mL increments:

- Plainly visible with either clear or turbid samples
- Solvent resistant printing will not rub off

White writing area:

- Facilitates sample identification
- Solvent resistant – will not rub off during routine laboratory procedures
- Compatible with a Sharpie®

Available in racked or bulk packaging configuration:

- Recyclable polystyrene racks offer convenience of oriented product presentation
 - Racks include viewing window slots, so samples can be viewed without removing tubes from rack
 - Rack positions are numbered for easy identification of tube locations
 - Racks are easily stackable
- Bulk packaging uses 40% less packaging material, an environmentally friendly alternative
- Both configurations feature a medical-grade, peel-open format for aseptic presentation of sterile tubes

STERILITY:

Product is gamma irradiated

REGULATORY COMPLIANCE:

Falcon® products are manufactured under the current ISO 9001 and the current FDA Quality System Regulation 21 CFR Section 820.
