## TECHNICAL DATA SHEET

# REDUCTION CUPS

2 types of REDUCTIONS for automatism with level detector

| Family: SAMPLE CUPS |                                                                                 | Vol. ml | Dim. mm   |
|---------------------|---------------------------------------------------------------------------------|---------|-----------|
| BSA636              | Reduction cups for tubes Ø 13 mm in PS<br><i>Normal Type, for tubes of 5 ml</i> | 1       | Ø 13 x 30 |
| BSA646              | Reduction cups for tubes Ø 16 mm in PS<br><i>Big Type, for tubes of 10 ml</i>   | 2       | Ø 16 x 30 |

### IN VITRO DIAGNOSTIC MEDICAL DEVICE CE FOR PROFESSIONAL USE ONLY

- Use only for laboratory analysis
- Use gloves: contamination risk if contents leaks
- Keep out of flame or heat sources which might damage the product
- Do not use after expiry date
  - Do not vary the intended purpose of the product
  - Keep out of reach of children
  - Store in dry place, temperature range: min. - 10°C max 50°C
  - Disposal: use appropriate personal protective equipment and act according to applicable regulations

#### MANUFACTURER DEFINITION

BIO SIGMA s.r.l.

Via Valletta, 6 - 30010 - Cantarana di Cona (VE) - ITALY

Tel. +39.0426.302224 - Fax +39.0426.302228

E-mail: [info@biosigma.com](mailto:info@biosigma.com) - <http://www.biosigma.com>

#### DESTINATION USE

Reduction Cups are disposable labware intended to be used on laboratory to contain biological liquids for in vitro diagnostic analysis.

FOR IN VITRO USE ONLY.

The use and the manipulation of the devices **are reserved to the medical and technical staff** with the necessary professional qualification.

## TECHNICAL DATA SHEET

### USE:

- Take a part of the sample
- Transfer it in the Reducer
- Put the Reducer in the first tube
- Start the analysis

### CLASSIFICATION

In order to the Directive 98/79/CE concerning medical-diagnostic in vitro devices receipt in Italy with D.L. n. 332 G.U.R.I. n. 269 dated 17<sup>th</sup> November 2000, Biosigma s.r.l., defines all the components of the above-state family as medical-diagnostic in vitro devices and it classifies as "Other medical-diagnostic in vitro devices", in order to make conformable the attachment III of the directive.

### MATERIALS

The materials utilized for the production of the in vitro labware devices are selected on the base of the properties indicated for the individual destination use.

The devices **Reduction Cups** are manufactured in POLYSTYRENE (PS) ;

The polystyrene is rigid and non-toxic, with excellent dimensional stability and good chemical resistance to aqueous solution but limited resistance to solvents. This clear material is commonly used for disposable laboratory products. Products made of polystyrene are brittle at ambient temperature and many crack of break if dropped from benchtop height.

### MATERIALS USED FOR THE PACKAGING OF THE PRODUCTS

All the materials used for the packaging are products made in materials not polluting, suitable to the aim.

The Declaration of Conformity in accordance to the **Directive 98/79/CE** is available, on request, to the Quality Department Biosigma S.r.l.

### Interpretation of the symbols on the package

|  |                                                                                                    |  |                                                           |
|--|----------------------------------------------------------------------------------------------------|--|-----------------------------------------------------------|
|  | This product fulfils the requirements of Directive 98/79/EC on in vitro diagnostic medical devices |  | Symbol for "Keep dry"                                     |
|  | Symbol for "Do not reuse"                                                                          |  | Symbol for "batch code"                                   |
