

## Statement of Quality Conformity for Electroporation Cuvette

This statement of quality covers the following products:

**Product Description:** Electroporation Cuvettes  
**Product Code:** BR-201  
**Batch Number:** 4786  
**Manufacturer:** Cell Projects Ltd. With its commercial and registered addresses as shown at the foot of this document.  
**Manufacturing Date:** 03.03.2025

This document confirms that:

1. Batch 4786 of electroporation cuvettes manufactured, to our best knowledge do not use, nor contain, any animal products or materials of animal origin.
2. Following manufacture and packaging of all batches, the cuvettes are gamma irradiated with a dose range between 9kgys to 12kgys, each case within a batch is marked for a positive gamma treatment using gamma indicator labels and additionally each case receives its own batch tracing label noting date and time of treatment.

All batches of BR-201 cuvettes cannot be transferred into stock until a quality control test has been passed using both physical and visual tests. These include (but not exclusively) leakage containment tests, gap width measurements and detailing any manufacturing defects observed under a microscope.

All details of the batch numbering and QC analysis are held on file.
