

AS600 Multiple Vacuum Filtration Apparatus

The stainless steel manifold is fitted for three or six filtration units.

Overview

The stainless steel manifold is fitted for three or six filtration units. The apparatus can be autoclaved and sterilized by dry heat at up to 180°C. Suitable only for vacuum operation. If flushing tubes are used, do not exceed 1.3 bar (300 mbar over-pressure). Applications includes: Microbiology quality control, residue analyses, serial filtration carried out rapidly and easily with a common drainage outlet.
