

# Corning® Spin-X® UF Concentrators

CORNING

New!

*A size to fit all your  
concentrating needs*

Corning Spin-X UF centrifugal concentrators offer a simple, one step procedure for concentrating or desalting proteins and other biomolecules with 90% or better recovery.

## Features and Benefits

- ▶ The vertical membrane design and thin channel filtration chamber minimizes membrane fouling and provides fast, high speed concentrating, even with particle laden solutions.
- ▶ Integrated dead stop design eliminates risk of spinning to dryness; no respinning necessary
- ▶ Choice of three sizes for greater flexibility:
  - Spin-X UF 500 for samples up to 500  $\mu$ L
  - Spin-X UF 6 for samples up to 6 mL
  - Spin-X UF 20 for samples up to 20 mL, 14 mL if using fixed angle rotors
- ▶ Low binding polyethersulfone (PES) membranes are available with five molecular weight cut-offs (MWCO): 5,000, 10,000, 30,000, 50,000 and 100,000 to meet all of your concentrating needs. Choose an MWCO  $\frac{1}{2}$  to  $\frac{1}{3}$  smaller than the protein to be concentrated.
- ▶ The MWCO and graduations are printed right on the side of the concentrator tube to avoid mix-ups

Spin-X UF 6 and 20 concentrators can be used with either swinging bucket or fixed angle rotors. Spin-X UF 500 concentrators require fixed angle rotors.
