

Material Safety Data Sheet

Version 1.1 Revision date 07.04.2020

1. DETAILS OF THE CHEMICAL AND SUPPLIER

Product name FastGene Scriptase II

Product code LS53, LS53s

Recommended use of the chemical and restrictions on use

Recommended use Research and development only Restrictions on use Research and development only

Details of the supplier

Company name Nippon Genetics Europe

Address Mariaweilerstraße 28-30 52349 Düren, Germany

+49 2421 554960

Emergence contact number

2. HAZARDS AND DANGEROUSNESS

Classification of Hazards and dangers No relevant classification

warning article including prevention methods

Pictorial symbol No information available
Category No information available
Hazards and dangers No information available

Prevention methods

Prevention No information available
Action No information available
Store No information available
Discard No information available

Other hazards and dangers (NFPA) not included in classification

Health
Fire
Reactivity

3. CONSTITUENT TITLE AND AMOUNT

	Material name	Usual name	CAS No.	Amount (%)
Glycerin		GLYCEROL	56-81-5	40 ~ 55

4. FIRST AID MEASURES

Eye contact Consult a physician

Immediately rinse skin and eyes thoroughly with plenty of running

water for at least 20 minutes.

Skin contact Consult a physician

Remove contaminated clothes and shoes and isolate contaminated area

Immediately rinse skin and eyes thoroughly with plenty of running water for at least

20 minutes.

Fire risk when drying contaminated clothes

Inhalation Remove to fresh air

CPR when there is no breathing

Provide Oxygen when breathing is difficult

Provide warm and stability

Ingestion Emergency medical measurers

5. FIRE FIGHTING MEASURES

Proper (improper) fire extinguishing agents

Use Alcohol foam, carbon dioxide or water spray to extinguish fire with this product

Use dry sand or soil to extinguish choking digestion

Specific hazards from chemical compounds

Make strong fire; oxidizing agent

Fire when contact with other combustible materials

Residuary material can act as oxidizing agents after drying Intense chain reaction give raise to fire and explosion

Ignite combustibles (wood, paper, oil, clothing)

Heating may explode vessel

Leak material may cause fire/explosion

Accelerate burn in a fire

Portion may explode in a fire or high heat May explode by heat or contaminates

Portion may explode in a reaction with hydrocarbon

Portion may ignite combustible materials as oxidizing agent

May generate Irritation, corrosive, toxic gas in a fire

Protective equipment and precautions for fire fighting

Glycerin No information available

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Micro particles can ignite fire or explosion therefore remove all the sources of fire.

Separate combustibles from leaked material

Stop leak if it is not dangerous

Do not contact with leaked materials without wearing proper protective equipments

Give attention to materials and conditions that should be avoided

No information available

Containment and cleaning up Build a dike and pool water for fire extinguish

Do not use flammable materials such as sawdust

Make a ditch to contain large leak

Pool released material by clean shovel into clean and dry container, tie it and then

remove from released area

After probation clean contaminated area with water

7. HANDLING AND STORAGE

Environmental precautions

Precautions for safe handling

Take measure not to mix with combustibles

Do not expose to pressure, cut, weld, solder, inoculate, drill, grind or expose to heat,

chemical flame, fire, electricity or other ignition sources

Explosion can cause injury or death

Residue of the product may remain in the container even after cleaning therefore

follow all the MADS/label precautionary steps

Pay attention to materials and conditions that should be avoided

Refer to engineered management and personal protection while working

Store far from heat, spark, flame, high heat - no smoking Conditions for safe storage

Isolated storage from combustibles

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure standard of chemical compound, biological exposure standard

Domestic regulations

Glycerin TWA - 10 mg/m³

ACGIH regulation

Glycerin TWA - 10 mg/m³

Biological release regulation

Individual protection equipments

Respiratory system protection

Glycerin

Glycerin

Not related

No information available

Use certified respiratory protection equipments in a release of gas/liquid according to their chemicophysical properties.

Use proper filter or half-circled respiratory protection cartridge equipments if the concentration of released material is lower than 100 mg/m³

Use proper filter or loose-fitting respiratory protection cartridge equipments such as hood/helmet shape motor operated equipments or continuous flow protection mask if the concentration of released material is lower than 250 mg/m³

Use proper filter or full face cartridge or motor operated half-circled equipments or half circled continuous flow air supply respiratory protection equipments if the concentration of released material is lower than 500 mg/m³

Use proper filter or full faced respiratory protection cartridge equipments or hood/helmet type, pressurized mask if the concentration of released material is lower than 10000 mg/m3

Use proper filter or auto air supply (SCBA) equipments or pressurized auto air supply (SCBA) respiratory protection equipments if the concentration of released material is lower than 100000 mg/m³

9. CHEMICOPHYSICAL PROPERTIES

Appearance

State Liquid

Color Dark color to yellow color

Smell

No information available Smell liminometer

Neutral рΗ 20 °C Melting point/freezing point Early boiling point and range 171 °C

160 °C ((c.c.)) Flashing point

Evaporation rate No information available

Liquid Evaporation rate (solid/liquid)

Maximum / minimum evaporation or explosion 19 / 2.7 %

range

Steam pressure 0.0025 mmHg (at 50 °C)

water solubility:1000 g/l at 25 °C solvent solubility: alcohol, ethyl acetate, ether Solubility

insolubility, benzene, chloroform, carbon tetrachloride, carbon disulfide, oil ether, oil

Vapor density 3.1 ((air=1)) Specific gravity 1.2613 ((water=1)) n-octanol/ distribution coefficient No information available

Self-ignition temperature 370 °C Disassemble temperature 290 °C

954 cP (at 25 °C) Viscosity

92.09 Molecular weight

10. STABILITY AND REACTIVITY

Chemical stability and possibility of hazardous reactions

Glycerin

No information available

Situation to avoid

Glycerin No information available

Materials to avoid

Glycerin No information available

Harmful material produced by degradation

Glycerin No information available

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Irritation, difficult to breath, area, vomit, diarrhoea, headache, dizziness, Glycerin

dyssomnia, kidney problem, paralysed

Health maleficence information

Acute poison

Oral

LD50 27200 mg/kg Rat (rat/LD50/12600 mg/kg(IUCLID) Glycerin

Dermal

LD50 > 10000 mg/kg Rat Glycerin

Inhalation

No information available Glycerin

Skin corrosivity or irritant agent

No irritation on skin Glycerin

Serious eye damage or irritation

No irritation on eyes Glycerin

Respiratory organ hypersensitiveness

No information available Glycerin

Skin hypersensitiveness

Glycerin No information available

Carcinogenic

Occupational safety and health acts

No information available Glycerin

Employment announcement

Glycerin No information available

No information available Glycerin NTP

No information available Glycerin

EU CLP

Glycerin No information available

Germ cell mutagenicity

Many color mammal red blood cell/negative Glycerin

Reproduction toxicity test

No information available Glycerin

Special target poison (1 time exposer)

No information available Glycerin

Special target poison (long exposer)

rat (inhale): 1-4 mg/l Glycerin

epiglottis epithelium

Absorption injurious

No information available Glycerin

12. ECOLOGICAL INFORMATION

Ecotoxicity

Fish

LC50 5000 mg/l 24 h Carassius auratus Glycerin

Crustacean

Glycerin

EC50 > 10000 mg/l 24 h Daphnia magna (Daphnia magna EC50 (24 h)10000 mg/l

(US EPA ECOTOX); Daphnia magna EC50 (24 h) >10000 mg/l (EUIUCLID))

Algae (LC50 (96 h) 77712.039 mg/l)

Glycerin

Residual fungicide and resolvability

Residual fungicide

No information available Glycerin

Resolvability

No information available Glycerin

Life enrichment

Enrichment

Glycerin No expected life enrichment

Biodegradability

63 % 14 day Fast biodegradability (OECD SIDS), Glycerin

93 % biodegradability in 30 days (OECD TG 301D) (IUCLID))

Soil

No information available Glycerin

Other harmful influences

Environmental summary: No information on toxicity on aquatic organisms Glycerin

13. DISPOSAL CONSIDERATIONS

Waste treatment method

No information available Glycerin

Malter that require attention for disposal

Dispose container and content according to the waster control act Glycerin

14. TRANSPORT INFORMATION

IATA

Proper shipping name

Glycerin No dangerous good in sense of these transport regulations

Hazard class

Glycerin No information available

Subsidiary class

Glycerin No information available

Packing group

Glycerin No information available

UN-No

Glycerin No information available

Environmental hazards

This information is only intended to describe the safety requirements of the product and is based on the present state of our knowledge. They do not constitute a guarantee for the characteristics of the product described in the sense of the statutory warranty regulations. Please refer to the respective product data sheets for the delivery properties. If the product mentioned in this Material Safety Data Sheet is blended, mixed or processed with other materials, the data in this Material Safety Data Sheet may not be transferred to the new material, unless otherwise specified.
