

FastGene® PAGE Protein System  
FastGene® Western Blot System  
FastGene® Western Blot components

Certificate of Conformance

Cat. No.
PG01
PG08
PG09

## Product Description

The FastGene® PAGE Protein System contains all the necessary equipment you need for PAGE protein analysis. The FastGene® Western Blot System is an efficient device to perform the first Western Blot protein transfer step from gel to membrane via a wet electrophoretic transfer technique. The FastGene® Western Blot Components (PG09) are part of the FastGene® Western Blot System (PG08). Combined with the FastGene® Gel/Blot Chamber Lid and the FastGene® Gel/Blot Chamber Tank, the FastGene® Western Blot Components can easily be used to upgrade the FastGene® PAGE Protein System (PG01) for Western Blotting.

FOR RESEARCH USE ONLY

## Notice to Purchaser:

Nippon Genetics products are to be used for research only. They may not be used for any other purpose. Nippon Genetics products may not be transferred to third parties, resold, modified for resale, or used to manufacture commercial products or to provide a service to third parties without written approval of Nippon Genetics.

## Storage temperature:

Store at room temperature.

## Quality Control

We certify that the product has met all requirements of the purchase order including drawings and specifications at the prescribed revision level.
