To Whom It May Concern,

The following is in response to your request supporting POPs and Mercury free materials used to manufacture Clearline Plus brand tips.

Based on the available documentation provided by our raw material suppliers,

This product complies with the CONEG Model Legislation for requirements regarding the defined limit for the sum of heavy metals (lead, mercury, cadmium and hexavalent chromium).

Based on the available documentation from raw materials suppliers, this product complies with the directive 94/62/EC and as amended concerning the defined limit(s) of heavy metals.

The polypropylene used in the manufacturing of our pipette tips is carefully sourced and verified to be free of harmful substances. Additionally, no additives, coatings, or treatments involving POPs are used during production. This guarantees that our products meet the highest safety standards for laboratory use.

To the best of our knowledge the information contained herein is accurate. Customers should conduct end use testing to determine suitability of the product in their application.

Regards,
