Description

Blue Devil Autoradiography & Blotting Film
Blue Devil, Interleaved, 100 Sheets/Unit

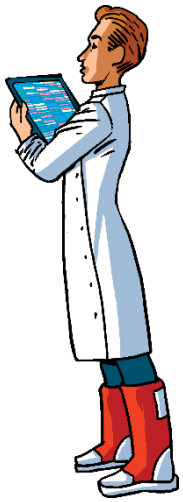

Part number

789173

Pieces by sales : 100

Description

Genesee's Blue Devil interleaved autoradiography film produces exceptional clarity and sharpness with extremely low backgrounds. This blue x-ray film is optimized for western blotting, sequencing, chemiluminescent autoradiography (ecl) and gel shift analysis. The high sensitivity and contrast makes it suitable for 14C, 35S, 32P , and 125I. With this film, you can expect publishable results and lot-to-lot consistency.

Try Blue Devil Lite Film for the lowest background - ideal for chemiluminescence (Cat #: 30-101L)

Product Overview

- Publication quality film
- Excellent results for exposure of blotting experiments
- High sensitivity and contrast
- Ideal for autoradiography and chemiluminescence
- Exceptional sharpness, clarity and low background
- Suitable for 14C, 32P, 33P, 125I, 35S
- Compatible with automatic or manual processors
- 5 x 7in (127 x 178mm)

Technical Specifications

- For Use With : 14C, 32P, 33P, 125I, 35S
