

RAININ Pos-D™

With Truly Ergonomic Benefits

No need to grip

Hand-friendly ergonomic fingerhook allows you to rest your hand while you work.

Comfortable

Pos-D has a natural feel and fits comfortably in your hand due to larger and more ergonomically designed handle.

Visible

The display faces the user, so there is no need to twist the pipette to set or read volume.

Problem-free pipetting of problem liquids

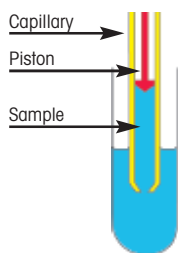

Pos-D is specially suited for liquids with high densities, viscosities or vapor pressures.

Given the disposable capillaries and pistons, positive displacement absolutely eliminates cross-contamination from aerosols, samples or pipette.

A disposable piston, which moves within a plastic capillary, makes direct contact with the liquid. The positive wiping action of the piston against the capillary wall assures complete dispensing without droplets.

RAININ Pos-D

Discover ergonomic positive displacement pipetting

No aerosol contamination
The piston makes direct contact with the sample, ensuring reliable accuracy when pipetting liquids with different characteristics than water. Disposable capillaries and pistons ensure absolutely contamination-free pipetting

Ready to use
There is no need to assemble pistons into capillaries before use due to preassembled covered racks. All capillaries and pistons are presterilized.

RAININ Pos-D Specification

Cat. No.	MT Order No.	Volume Range µl	Volume µl	Accuracy		Precision	
				%	µl	%	µl
MR-10	17008575	0.5–10	1	9.0	0.09	3.0	0.03
