Rainin BioClean Ultra Tips Deliver

METTLER TOLEDO

Enhanced Purity Standards

Guaranteed Quality and Performance

BioClean Ultra™ ... the new benchmark for tip purity and performance

BioClean has long been the standard for assuring customers that Rainin tips are pristine and free of biological contaminants. With BioClean Ultra, we've made these industry-leading measures for purity even more comprehensive. For proteomics researchers, we have added protein and protease to our testing regimen.

In concert with the development of the BioClean Ultra quality testing process, we redesigned the packaging for our racked tips, Green-Pak® and Green-Pak SpaceSaver® products. The result is an integrated rack and refill system that provides greater utility and ease of use, higher cleanliness and less environmental impact.

Why Rainin?

When it comes to purity, performance and attention to detail, we think you'll agree that no other tip, rack and refill system comes close.

BioClean Ultra = Ultra Pure

Our tips are manufactured in Class 100,000 cleanroom conditions, rigorously tested for a broad range of contaminants, including protein and protease, and carefully packaged to protect their purity.

Hinged Lid Also Lifts off

Thoughtful design and precision engineering have resulted in a hinge that holds the lid open at a full 120° – perfect for fully or partially loading an 8- or 12-channel pipette. Press further and it gently releases.

Opens with One Hand

The safety latch on the front of the rack prevents tips from accidental spills. The latch opens easily with gentle pressure from your thumb and index fingers.

An integrated rack and refill system

Hinged/removable lid rack (RT)

Green-Pak® (GP)

Multichannel-Friendly

The walls of the tip box are tapered to allow full or partial tip loading from any angle. Even in hinged mode, the opened lid allows complete, unobstructed access to the tip deck.

Easy-Read Labels

High-resolution labeling on the front of the racks provides product details in an easy-read format. The colored tip decks extend along the perimeter of the box, making the volume readily apparent.

Less Plastic, Lighter Weight

Integrating the tip deck and base adds strength and stability. The result: we've reduced the amount of plastic used in each by an average of 20%. Less plastic means less weight and less plastic waste.

Fully Autoclavable

Our new racks are fully autoclavable and can withstand many trips through the autoclave. They're refillable with the Green-Pak single rack refill or from our SpaceSaver stacked refill system.

* SpaceSaver no longer comes with an extra rack. When ordering BioClean Ultra tips for the first time, purchase empty racks or racked tips in a matching size to use this refill system.

** Can be also used with UNV 10 µL ShaffGard tips.

Pipetting 360°

Your Performance Guarantee

Pipetting is a system: the pipette, the tip and periodic calibration

- Quality, performance and extraordinary comfort are why Rainin pipettes are industry leading.
- Rainin pipette shafts and tips are designed to work together, so they load smoothly and comfortably.
- For calibration or service, no one is more experienced or knowledgeable about your Rainin pipette than your Rainin or Mettler Toledo service technician.

Why risk your research with poor pipetting performance?
For your pipetting system, choose Rainin!
