Faster, More Repeatable Workflows

Affordable, Portable 96-Channel Pipetting

Simplify Your Workflows

From the touchless tip ejection and programmable Pipetting Depth Recall™ to precise speed control and the ability to save complex, multistep protocols, the Rainin MicroPro boosts productivity, reduces operator error and improves reproducibility on the lab bench.

Your Research Assistant

MicroPro goes beyond simply adding and mixing reagents by offering convenient features such as aliquot dispensing, sample dilution with mixing and multi-aspirate with mixing.

Custom Protocols

Custom protocols are easy to create and allow you to build and save a tailored sequence of instruction and liquid handling steps that exactly match the needs of your protocols.

Compact Design

At just over 12 inches high and 7.5 inches wide, MicroPro is the smallest semi-automated 96 channel pipette on the market, freeing up valuable space in your biosafety cabinet or lab bench. And weighing a touch over 11 pounds, the microPro is the only truly portable system.

Rainin MicroPro 20 and 300
Exceptional Ease and Speed

The electronic Rainin MicroPro 96-channel benchtop pipettor simplifies and streamlines 96- and 384-well microplate work, from filling plates to complex, multi-step workflows. Compact, highly affordable and easy to use, the MicroPro wirelessly connects to a high resolution touchscreen controller that delivers an intuitive and user-friendly experience, with every feature and function right at your fingertips.

METTLER TOLEDO

Rainin MicroPro
Faster, Better Workflows

- 20 µL and 300 µL models
- Multi-function pipetting
- Intuitive touchscreen interface
- RingLock tip system
- Pipetting depth recall
- Touchless tip ejection
- Saved programs
- 10x speed control
