

PAXgene® Blood DNA Tube

Blood DNA Stabilization for Molecular Diagnostic Testing

PAXgene Blood DNA Tube

The first blood collection tube designed specifically for *in vitro* diagnostic (IVD) DNA testing

Intended Use

For the collection, anti-coagulation, stabilization, transport and storage of venous whole blood for preparation of high-quality DNA for use with molecular diagnostic test methods that require DNA.

Feature	Benefit
Validated DNA yield and purity for various times and temperatures related to blood collection transport and storage	<ul style="list-style-type: none">✓ Eliminates the need for self-validation✓ Defines acceptable processing conditions
Unique blue cap and label color identify tube for DNA testing	<ul style="list-style-type: none">✓ Minimizes potential sample misidentification
2D Barcode: Unique sample identifier, lot number and expiration date	<ul style="list-style-type: none">✓ Facilitates sample identification and tracking✓ Eliminates labeling errors
CE Mark for IVD use	<ul style="list-style-type: none">✓ Assurance of high-quality DNA for diagnostic testing

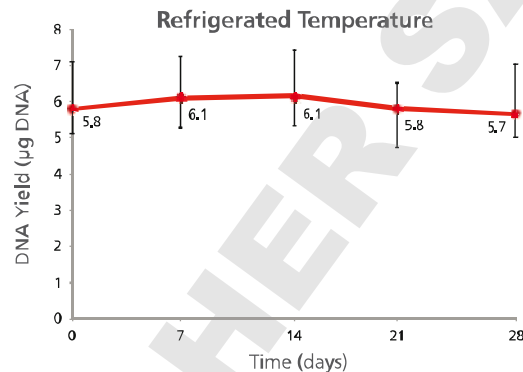

Tubes shown are not actual size

PAXgene Blood DNA Tube

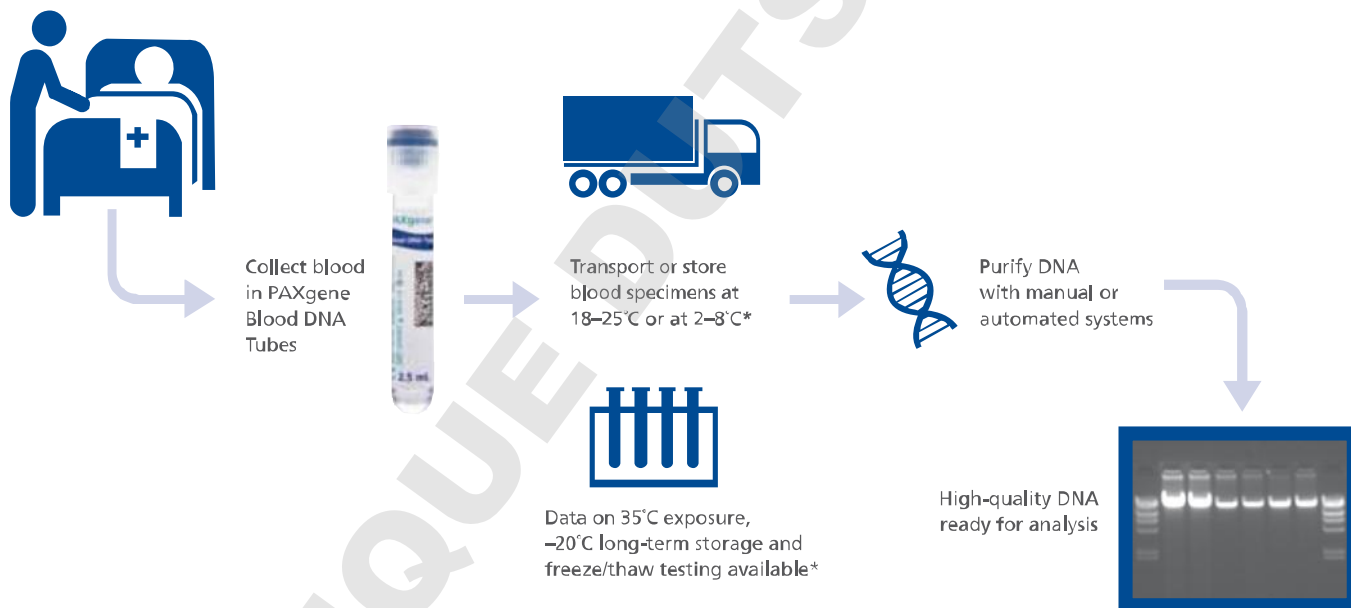

Stable DNA Yields During Transport and Storage

DNA yield (median and range; n=12) in 200 µl eluates from whole blood collected in PAXgene Blood DNA Tubes and stored for up to 14 days at 18–25°C

DNA yield (median and range; n=12) in 200 µl eluates from whole blood collected in PAXgene Blood DNA Tubes and stored for up to 28 days at 2–8°C

Reference Number	Product Description	Tube Size	Draw Volume	Pkg Box/ Case Qtys
761165	PAXgene Blood DNA Tube	13 x 75 mm	2.5 mL	100/1000

*See www.preanalytix.com for all PAXgene Blood DNA Tube performance data

PAXgene Blood DNA Tubes are distributed by BD and its distributors
