

Cat. 8019

Agarose D1 Medium EEO

Agaroses

Practical information

Industry: Molecular biology / PCR and Electrophoresis / Cloning / Proteomics / NGS

Principles and uses

Agarose D1 Medium EEO is used in nucleic acid analytical and preparative electrophoresis and protein electrophoresis.

Some important characteristics are:

- Extraordinary mechanical resistance for more reliable and easier handling.
- Possibility of varying pore size in accordance with particle size by modifying the gel concentration.
- Easy preparation of the gel by simple dilution in aqueous

buffers either by standard boiling or microwaving.

- Greater thermal stability due to high hysteresis (difference between gelling and melting temperatures).
- Excellent transparency of the gel and high visibility.
- Exceptionally low absorption of staining agents.
- Absence of toxicity (polyacrylamide is neurotoxic).

Physical-chemical characteristics

Description	Specification	
Ash	<=0,5%	
Sulfate	<=0,14%	
Clarity 1,5 % (NTU)	<=4	
Gel strength 1% (g/cm2)	>= 1000	
Gel strength 1,5% (g/cm2)	>= 2200	
Gelling temperature 1,5 % (°C)	36 ± 1,5	
Melting temperature 1,5% (°C)	88 ± 1,5	

Storage

Temp. Min.:2 °C Temp. Max.:25 °C
