

Safetyspace™ Filter Tips

Filter Tip to Protect
from Contamination

Product Information

Filter tips are an efficient way to avoid cross-contamination of your sample and/or pipette and reduce the need for pipette maintenance. Sartorius Safetyspace™ Filter Tips have more space between the sample and the filter than conventional filter tips, which prevents the risk of the sample being absorbed into the filter. Safetyspace™ Filter Tips are ideal for use with Sartorius pipettes, enabling maximum accuracy and precision.

Description

Safetyspace™ Filter Tips are made of virgin polypropylene and the filter of polyethylene without any self-sealing additives to avoid contamination of the sample, which may affect the results. All the steps in the manufacturing process strictly follow ISO 9001 and ISO 13485 quality standards, and the tips are manufactured in ISO 8-classified cleanroom conditions to avoid any contamination. Every production batch of Safetyspace™ Filter Tips is tested for DNase, RNase, human DNA and endotoxins. The tips are released for sale once they have fulfilled the test requirements. Certificates are available at www.sartorius.com.

The additional space between the sample and the filter differentiates Safetyspace™ Filter Tips from other filter tips. This feature is particularly useful in reverse pipetting, pipetting foaming liquids (such as buffers and proteins), or when using Multi-Dispensing mode in electronic pipette.

Features

- Available in volumes from 10 to 5,000 µL
- All production batches certified DNase, RNase, human DNA and endotoxin free
- Informative rack labels indicating tip volume, product number, lot number, date, and purity level for improved tip identification and traceability
- All Safetyspace™ Filter Tips are E-beam pre-sterilized
- Perfect fitting and sealing with all Sartorius pipettes
- Smooth and ergonomic tip attachment and ejection ensured by compatibility with the spring-loaded Optiload mechanism of Sartorius pipettes
- Color-coded tip trays make it easy to match tip with appropriate Sartorius pipette
- Available in Single Tray flip-top racks that are easy to open and close with one hand
- Materials used in tips, trays, and racks are 100% recyclable or can be incinerated as energy waste

Safetyspace™ Filter Tips are also available as Low Retention tips. The Sartorius tip offering also includes Optifit non-filtered tips and Optifit Low Retention non-filtered tips (see catalog for details).

Applications

- Molecular biology
- Microbiology
- Cell culture applications
- Radioactive work
- Any application where preventing cross-contamination is vital

Intended Use

The Sartorius Safetyspace™ Filter Tips are intended, designed and manufactured to be used in liquid dispensing in a variety of applications and to be used in combination with Sartorius pipettes.

It is recommended that Safetyspace™ Filter Tips are used with Sartorius pipettes to ensure optimum compatibility and performance.

Technical Data

Technical Specifications*

Sterilization	Electron beam (beta irradiation) in accordance with EN 552 and ISO 11137 and validated by using 25 kGy as the minimum dose with SAL (sterility assurance level) of 10^{-6} .
Purity certificate	Every production batch (lot number) of tips is certified free of DNase, RNase, human DNA and endotoxins.
Endotoxin purity testing	Validated test result with Chromogenic kinetic method according to Ph.Eur. 2.6.14, Method D for endotoxin free pipette tip is < 0.005 IU/mL (EU/mL).
DNase purity testing	DNase-free pipette tips show no evidence of DNase activity in the fluorometric assay with the detection level of $< 6.25 \cdot 10^{-5}$ U/ μ L when DNase I is used as a standard.
RNase purity testing	RNase-free pipette tips show no evidence of RNase activity in the fluorometric assay with the detection level of $< 3.125 \cdot 10^{-9}$ U/ μ L when RNase A is used as a standard.
Human DNA purity testing	Human DNA free pipette tips show no evidence of human DNA in quantitative PCR (qPCR) using human DNA specific primers and with a detection level of <1 pg/ μ L.
Standards	ISO 9001 Quality management standard ISO 14001 Environmental standard ISO 13485 Medical device quality management standard ISO 14644-1 Class 8 cleanroom manufacturing standard
Autoclavability	No
Transportation conditions	Temperature: -50 °C to +50 °C Humidity: 10% - 90% Shocks: < 10 G
Storage conditions	Temperature: -20 °C to +40 °C Humidity: 10% - 60%
Filter pore size	20 - 40 μ m
Expiry date	5 years from manufacturing date*

* Extended filter tip sterility assurance level, DNase, RNase, human DNA and endotoxin testing detection limits may differ from values reported here. Please request a batch specific certificate from lhinfo.finland@sartorius.com

Materials and Recyclability

Tip	Polypropylene (PP) Recyclable, can be incinerated as energy waste
Polyethylene (PE)	Polyethylene (PE) Recyclable, can be incinerated as energy waste
Tray and Rack	Polypropylene (PP) Recyclable, can be incinerated as energy waste
Cardboard package	Cardboard Recyclable, renewable waste

Package Options

Single Tray racks
purity-certified tip racks

Ordering Information

Safetyspace™ Filter Tips

Order Code	Volume Range [µL]	Length [mm]	Package	Purity Level		Tips/Unit
				Certified free of DNase, RNase, human DNA, endotoxins	Pre-sterilized	
790011F	■ 0.1–10	31.5	Single Tray	■	■	10 x 96
