The Azlon® Round Integral Wash Bottle

Introduction

We are proud to introduce the new Round Integral Wash Bottle to the Azlon® range. With this design you can be sure to dispense liquids in a safe and efficient manner with extra protection from contamination.

The new Azlon® Round Integral Wash Bottle displays chemical names and key safety information in four European languages and also meets the latest requirements in European safety legislation – plus all of the regular features and benefits of this popular laboratory essential.

Traditional wash bottles consist of several components – a bottle, a cap and an inner tube. The inner tube can be a source of contamination when refilling as it is typically placed on a lab bench surface.

Chemical names in English, French, German and Spanish eliminate the need for multiple wash bottles across European language speaking countries.

Chemical formulae and CAS number for easy identification of solvent contained.

Globally Harmonised Symbols reflects the latest changes in European legislation including new pictograms.

Signal word (i.e. 'Danger'), to identify the severity of the hazard statements.

Key Features

- Wide mouth for easy filling
- Colour-coded lids and contents
- Precision jet tip for fine control
- Choice of indelibly printed solvent labels
- Custom printing available on request

The Azlon® Round Integral Wash Bottle has an integral inner straw that eliminates the need to place the inner tube down when refilling, minimising the risk of contamination.

Vented cap with PTFE membrane allows venting and prevents pressure build ups.

Precision jet tip ensures fine control.

Moulded graduations for approximate volume measurement.

Integral inner tube prevents bench-derived contamination when refilling.

Technical and Ordering Information

Azlon® Round Integral Wash Bottle

- Wide neck wash bottle with red, yellow, blue, green or orange cap
- 500ml capacity
- Fitted with colour-coded one-piece PP closure that maintains its shape in use
- Designed with integral spout to prevent contamination

Product Code	Closure Colour	Pack Quantity
