2. Burettes and Titrators for single applications

TITRONIC® 300 - Titrating manually, perfectly dosing

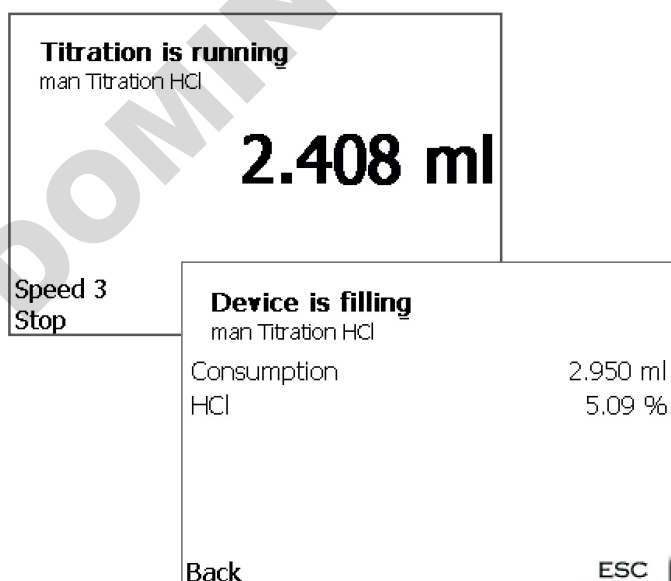

The TITRONIC® 300 is a perfect motor-driven burette for manual titration and precise dosing instrument for dispensable liquids, solvents and titrating agents.

The TITRONIC® 300 is not only a stand-alone device, but also shows its strengths in the computer-controlled

Manual Titration

While automatic titration is gaining ground, manual titration remains one of the standard cost-effective applications in the lab, wherever high precision and flexibility are required.

- Titration with hand controller (mouse).
- Titration rate can be adjusted in five different steps to optimize the titration speed and accuracy.
- Automatic calculation of results in different units and exportation to a printer or USB memory device.
- Automatic weight recording when a balance is connected. „Daisy Chain“ network. Up to 16 devices can be connected one behind the other.

The image shows a sequence of three screen displays from the TITRONIC 300 titrator. The top display shows 'Titration is running' with a volume of 2.408 ml. The middle display shows 'Speed 3 Stop'. The bottom display shows 'Device is filling' with consumption data: 2.950 ml HCl and 5.09 %.

Dosing

Beside the titration, there are various routine dosing tasks that must be performed in the lab. A piston burette is the ideal device for precise dosing tasks:

- Adjustable dosing and filling rate for each method.
- Adjustable filling between each dose step.
- The intelligent filling function checks if a dosing step is feasible without filling in advance. This reduces faulty operations during a serial dosing process.

Benefits TitroLine®/TITRONIC®

- * High visibility, full color display that can be easily viewed from a distance and at extreme angles
- * Standard methods for manual titrations and dosing
- * Export the results as PDF or CSV
- * USB-A and -B and RS232 interfaces for connection of keyboard, printer, PC, bar code reader, USB storage media and laboratory balance

TitroLine® 5000 - The easiest titration ever...

The TitroLine® 5000 is the first choice if you are looking for a very easy-to-use automatic titrator for an application. A special training or a deeper knowledge of automatic titration was not necessary to get precise and quick results. That and much more is exactly what the new TitroLine® 5000 stands for:

- High resolution pH/mV-measurement input for pH-, ORP-, silver - and further mV-electrodes
- Pt 1000 and NTC 30 temperature measurement input for automatic temperature compensation
- Pre-installed standard methods for FOS/TAC, alkalinity, total acidity in drinks, chloride etc.
- Linear and dynamic titration to equivalence points
- Titration to pH and mV-end points
- Same manual titration and dosing function as the piston burette TITRONIC® 300

TitroLine® 5000

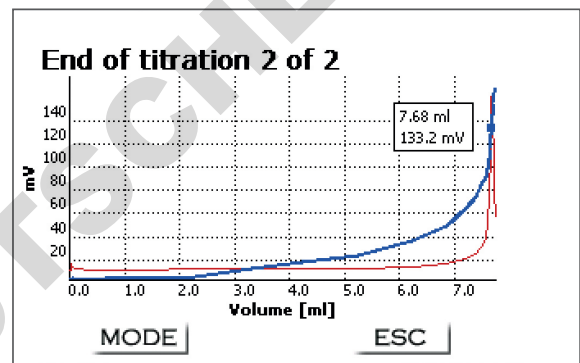

Typical applications of water/wastewater and environmental analysis

- pH-value, alkalinity (p+m-value)
- FOS/TAC (see titration curve and result screen as example)
- Total Kjeldahl nitrogen
- Permanganate index and COD
- Chloride in wastewater

Typical applications of food analysis

- Salt content (chloride, sodium chloride, see titration curve as example)
- pH-value, total acidity in wine, drinks, and other food products
- Ascorbic acid
- Protein determination (Kjeldahl nitrogen in milk and dairy products)
- Iodine and peroxide value

Specifications TITRONIC® 300

Interfaces:	1 x USB-A and 1 x USB-B, 2 x RS-232-C
Stirrer connection:	TM 50, power supply directly through piston burette
Keyboard:	The unit is operated using the keys on the device itself, the controller TZ 3880 and optional PC-keyboard (USB)
Display:	Graphics-capable TFT display
Volume display:	0000.000...9999.999 ml
Display resolution:	0.005-0.025 ml (depending on dosing unit)
Dosing speed:	Max. 100 ml/min (with 50 ml unit)
Filling speed	Min 30 s to 999 s adjustable (time according to the cylinder volume)
Dosing units:	20 ml or 50 ml dosing unit, interchangeable
Burette resolution:	8000
Dosing accuracy:	Systematic error 0.15 %, random error 0.05 % in compliance with EN ISO 8655-6
Power supply:	100 -240 V~; 50/60 Hz, power input 30 VA
Conformity:	ISO 8655, part 6
CE-mark:	EMC: 2004/108/EG; safety EG- Directive 2006/95
Dimensions	135 x 310 x 205 mm (W x H x D), including dosing unit, without stirrer
Weight:	2 kg (without stirrer)
Ambient conditions	Ambient temperature: + 10 ... + 40 °C for operation and storage. Humidity according to EN 61 010, Part 1: Max. relative humidity 80 % for temperatures up to 31 °C, linear decrease down to 50 % relative humidity at a temperature of 40 °C
